## P R E F A C E

Surat: The city located at on the coast of the Arabian Sea where the Tapti River (Tapi) passes from the middle of the city and various other creeks passes through southern part of the city which merges into the sea. Looking at the geographical location of the city, the city is prone to natural calamities like river/khadi flood, heavy rainfalls and cyclones. Keeping the motto “**Surat: The city that always cares**” in mind, Surat Municipal Corporation has contributed to the development of the city by providing not only the basic amenities but also the best in class infrastructure and services.

Along with the development of the city, the population of the city has also increased. With the increase in population there are possibilities of natural disasters and outbreak of disease. The impact of Global Warming and Climate Change can also contribute or cause disaster.

Considering the ideology of “**Precaution is better than cure**”, Surat Municipal Corporation is publishing the Disaster Management & Preparedness Plan since 2002. Disaster Management Plan of SMC consists of the guidelines and action plan for the activities to be carried out before, during and after the disaster covering various activities like rescue and relief work including relocating and rehabilitation. The aim of preparing the disaster management and preparedness plan is to reduce the response time in the event of any disaster. Such measures can help avoid human loss and reduce damages to properties. The DMP is updated with latest information every year.

This Disaster Management and Preparedness Plan also includes advanced planning and preventive measures in the event of natural disasters and outbreak of diseases. The plan contains information regarding the DO's and DON'Ts as a part of precautionary measures and information regarding first aid treatment for various disasters. The DMP also enlists the specific roles and responsibilities of employees/officers in case of disaster. Necessary training has been provided to the concern in this regard. Meetings and trainings area also organized with a view to increase people participation and to make them aware about the precautionary steps to be taken. Zone level and ward level disaster management plan is also prepared considering the decentralized administration.

We hope that this planning serves its purpose for the city.

We welcome your sincere suggestions to update this Disaster Management Plan.

## Chapter:1

### DISASTER

## Action Plan for Operation

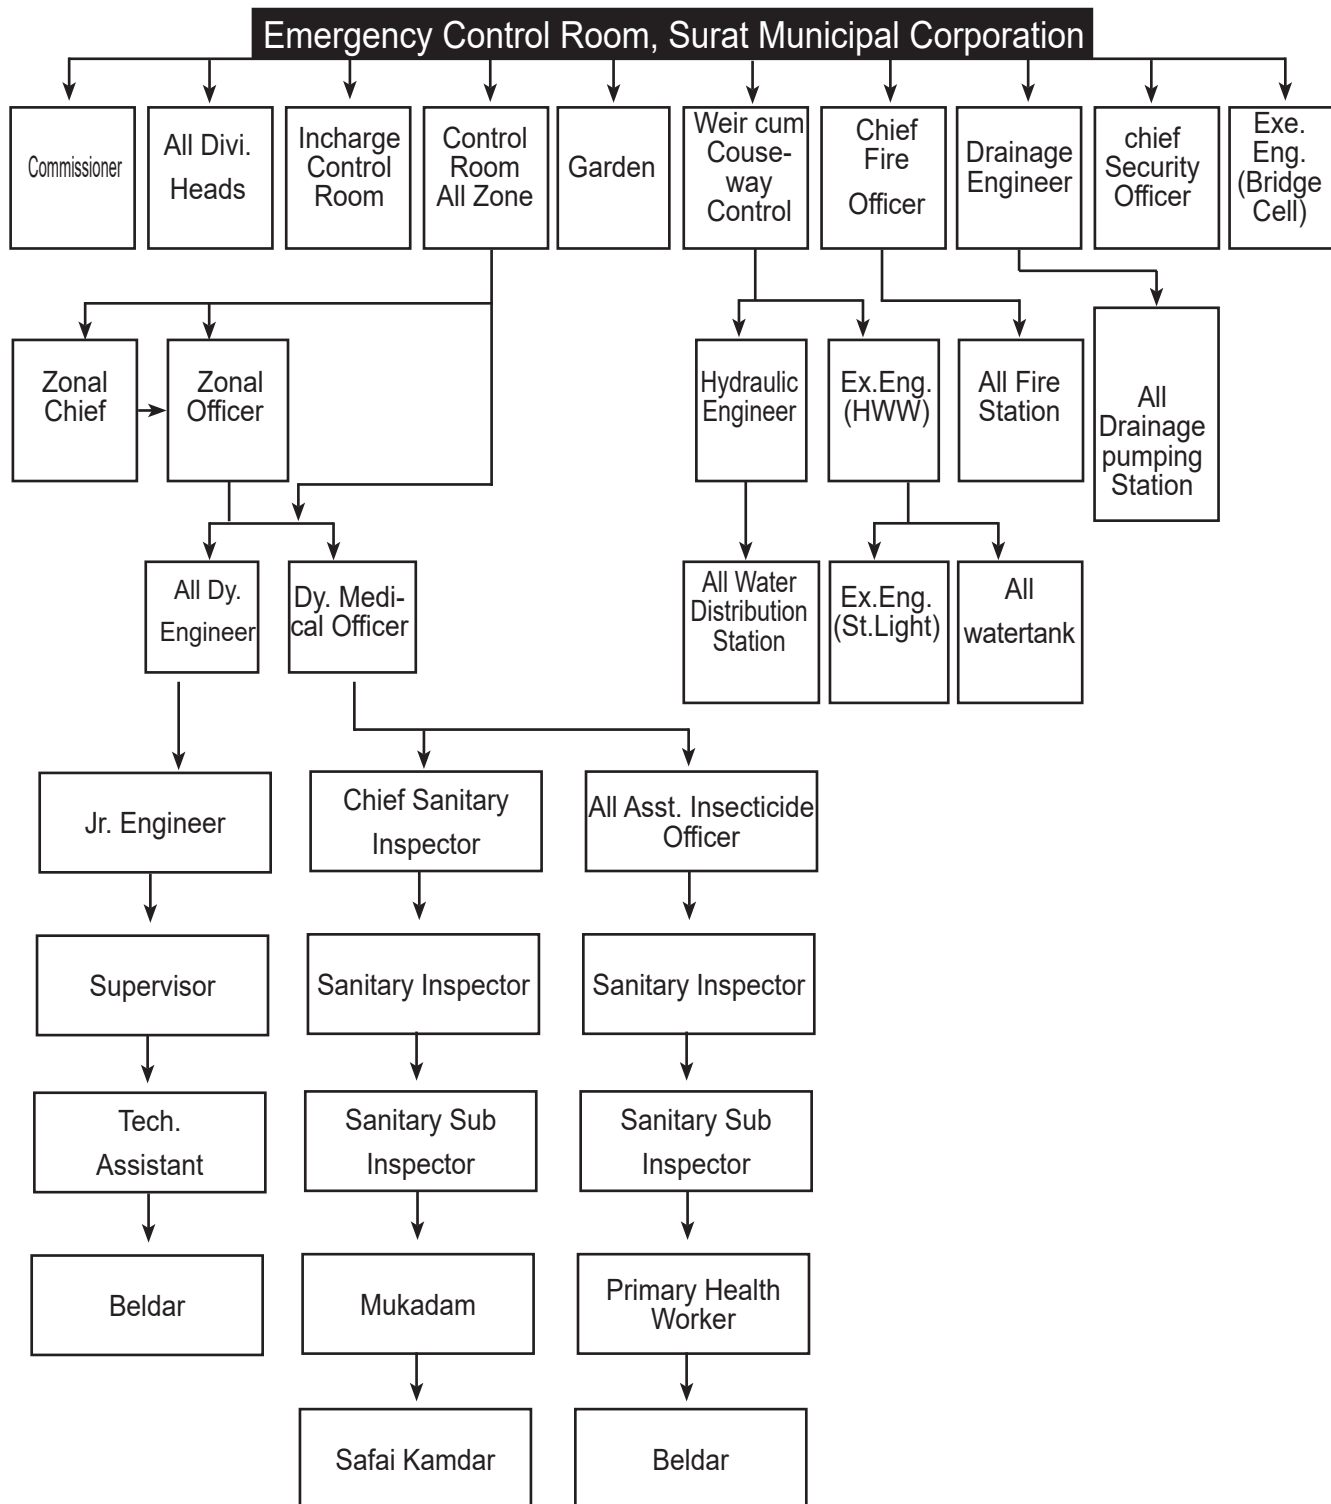

**NOTE:In case of large scale disaster either Commissioner or Dy.Commissioner (Deputation) will command & control over the situation.**

## Chapter:2

Arrangements made by the Surat Municipal Corporation in event of emergency due to Heavy Rains, Flood, Cyclone and Epidemics. Surat Municipal Corporation.

# I

## The Outline for transmission of the warning and the dangers of cyclone by cyclone danger & warning Transmission set up.

The warning bulletin no.....issued by the office of weather forecast of ..... at.....hours, Indian std. time dated.....

According to Indian std. time at .....hours on .....date a cyclone will be blowing from..... (Place) up to a distance of .....kms in .....direction. It is likely to be more acute in .....district and from.....day.....dates time there is a possibility of occasional downfall of heavy to very heavy rains. From ..... day .....date / time. Stormy wind is likely to blow up to speed of .....km per hour on the coastal areas of the sea of these districts. The fisherman of these coastal areas are advised not to go to sea.

## Terminologis for Tropical Cyclone

The classification adopted by India Meterollogical Department to classify such disturbances is based on maximum strength of sustained wind in the circulation.

Type of Disturbance	Associated wind speed
Low Pressure area	Less than 17 Kts.
Depression	17-27 kts.
Deep Depression	28-33 kts.
Cyclonic Storm	34-47 kts.
Sever Cyclonic Storm	48-63 kts.
Very severe Cyclonic Storm	64-119 kts. kts.
Super Cyclonic Storm	120 kts. and above

(1 knot = 1.85 kmph)

Expected Wind Speed	Expected damage
60-90 kmph	Tree branches broken off, some damage to kachchaa house.
90-120 kmph	Tree uprooted, pakka houses damaged, communication distrupted.
More than 120 kmph	Big tree uprooted, Wind spread damage to houses and installation. Total distrupction of communication.

## II

At.....hours IST on .....date (a bulletin) was issued by the center for Regional weather Forecast Ahmedabad for Transmission by the heavy danger warning setup.

Warning about cyclone to.....districts. On.....date IST at.....hours which are located about.....them direction of .....place at..... hrs. i.e.....hr./Km speed is likely to intensify and turn towards .....direction and is likely to strike on.....day a.....date and time to coastal areas of the sea and places beyond the sea coast.

The height of sea waves is likely to be higher than the ordinary sea waves by .....meters. The tidal waves will be higher than the ordinary waves by ..... meters when the storms arrive at the coast. They are likely to be disasters. The waves will be higher by..... Km the ordinary total waves on the coast of ..... districts.

There is possibility of water inundating the lower lying areas of the coast of the said districts. So the people on the coastal flooding areas are advised to take shelter or safe areas.

The speed of winds is likely to increase to .....km per hour in..... district. So during..... in .....districts big trees are likely to be uprooted & a likelihood of collapse of buildings, other properties and also complete disruption of communication.

In.....districts the speeds of the winds will be ..... km per hour. There is a likelihood breaking of tree branches and of damage to katcha building.

The bulletin No. .... for warning against cyclone is over here.

## III

### Format for Cyclone Alert for transmission through CWCS

## Telemetry Stations under Central Water Commission Tapi Division, Surat On Tapi River Basin LINE DIAGRAM OF RIVER TAPI, ORIGIN (MULTAI, BETUL DIST. IN M.P.)

## CHAPTER - 3

### The outlines of Rains / Floods at Surat.

Surat city is situated between 20.15' and 22.28' Longitudes and between 72.28' and 74.23' East Longitudes in Surat District area of South Gujarat. The area of Surat District is 462.149 Sq. Kms. According to 2011 census, the population of Surat District is 49,95,174 and that of Surat city is 46,45,384.

Kakrapar weir and Ukai dam are the two major dams constructed in 1953 and 1972 AD respectively on river Tapi.

### **The History of Cyclones:**

Surat district has coastal bank of 83.00 Kms & 26 villages having population of 66,781 are located on this sea coast. Occasionally Surat city has experienced heavy rains. But during the near past, it has no major impact of cyclone. Of course on the basis of historical records, the city suffered a big cyclone in 1782. It had taken a toll of a large nos. of old and new building at Burhanpuri gate. (There was no heavy toll of human life) The islands of Tapi were also submerged by it and 2000 people died. There was a heavy damage on the coastal areas also. Other Cyclones were experienced by Surat in the year of 1800 & 1872 too. But the impact of cyclone was comparatively less in Surat.

### **Details of rains:**

Heavy rain fall is registered in Surat frequently during monsoon season in the past. According to the study of metrological department, there is possibility of flood even in case of little rain as the catchments area of the upstream portion of river Tapi is too large. Obviously, heavy rains increase the possibility of heavy floods. Rains in the city are also a cause of flood situation.

Sr. No.	Year	Total rain fall of the season in inch	Total rain fall of the season in m.m.
1	1988	96.78	2448.90
2	1989	28.65	727.60

37	2024	83.96	2126.00

### 1968 Flood:

The heaviest flood in the river Tapi occurred in the year 1968. At that time 15.60 lakh cusecs water was discharged from Kakarapar weir on the river Tapi. The highest water level in river Tapi at Surat Hope Bridge was 103.50 feet. During the time of high tide in the sea the hike in water level recorded was up to 12 feet. Due to this flood, situation remained disturbed for a long period of time. During the period of 30 hrs. 25 inches of rain in Ukai and 15 inches of rain in Surat were recorded. The total area of 1360 sq.kms was flooded resulting into major losses/damages to life and property. The river overflowed at Mandvi, Baudhan, Kathor and Nana Varachha villages. Between Ahmedabad & Mumbai broad gauge railway flooded and was submerged under water. Surat City and Udhna industrial area had suffered from damages on a large scale.

Surat is situated on the banks of river Tapi & Arabian Sea is 15 km away from the city. Surat had faced natural calamities like cyclone and floods in the past, as the river Tapi passes through the city. Surat Municipal Corporation has taken precautionary measures in the past to protect the city from the damages caused by such natural calamities.

After 1968 flood, long term planning has been made for the protection against flood. This includes:

(1) Ukai dam was constructed in the year 1972 and due to these 8.40 lakh cusecs of flood water was put under control.

(2) Tapi flood protection project was sanctioned in the year 1971 by the planning commission & was revised and sanctioned in the year 1993.

### Flood in the year 1994, 1998 & 2002:

After the construction of Ukai dam, flood was partially controlled. In the year 1994 and 1998 floods release of water was 5.25 lakh cusecs and 7.00 lakh cusecs respectively. Incomplete work of sluice regulators and embankments at Chhaprabhatha, Variav and Tunki were the main reasons for the entry of flood water in the city.

Due to flood in 1998, 23 villages and population of 14.50 lakh residing in 245.59 sq.km areas were adversely affected. Out of these Rander, Katargam and Umra areas of the city were worst affected. In the year 1998, release of 7 lakh cusecs of water, highest flood level of 11.40 meters (101.30 feet) was recorded at Hope Bridge on the river Tapi. Due to release of 3.25 lakhs cusecs of water, highest level of 8.20 meters (91.94 feet) was recorded at Hope Bridge of the river Tapi in the year 2002.

It has therefore, emerged that advance planning and effective long term measures for the prevention of flood is very necessary, which includes preparation of flood maps of prime areas and assessment of flood work.

### Flood of August 2006 (6-8-06 to 11-8-06):

Owing to the inflow of water from the catchment area in the Ukai dam in August-2006, water was discharged on large scale from the dam which was comparatively more than the inflow of water discharged in previous years. Actually, there was a release of 6.0 to 7.50 lakh cusecs of water continuously for 13

## DISASTER MANAGEMENT AND PREPAREDNESS PLAN

hours and 8.0 to 9.5 lakh cusecs of water continuously for 42 hours 128 s.q.kms area of the city out of 326 s.q.kms had the impact of flood.

### Details of flood in river Tapi.

The lower area of the Tapi river basin is frequently affected by floods & generally it is seen that there is a possibility of flood at an interval of four years. Surat city had suffered from 10 (ten) heavy floods in 19th century (1801-1900) and 19 (nineteen) heavy floods in 20th century (1901-2000). These floods have taken a heavy toll of life and property.

### **The details of floods in river Tapi between 1876 and 2014 AD**

Sr. No.	Year	Date / month	Highest level at Nehru Bridge (Danger level 9.50 meters)	Highest level of Kakrapar weir (Danger level 176 feet.)	Discharge from Kakrapar wier (in lakh of cusecs)

## CHAPTER - 4

### Surat Municipal Corporation Public Request.

#### About the flood warning sirens blown to warn the public about flood

When there is a possibility of flood in the river Tapi, Siren is blown, such that the citizens of Surat get timely information on regular basis. When the flood level in the river reaches at 7.5 meters (89.42 ft.) to 8.5 meters (96.00 ft.) at Nehru Bridge the siren blows as follows.

1. When the river level rises 7.5 meters the Siren is blown continuously for one minute.
2. When the river level rises to 8.5 meters (warning level) the Siren is blown for half a minute and again for half minute and again for half minute, each time after an interval of half a minute.
3. When the river level raises to 9.5 meters (danger level) the Siren is blown intermittently for 2 minute.

Every morning the Siren is blown at 10:30 a.m. regularly. However at times of possible announcement, the information will be made available to public through mobile van in addition to blowing of Siren for warning the public.

In the morning from 10 hours on date ...../...../..... as per the following schedule various types of Siren is blown at the times of warning / danger level of water of river Tapi to make public acquainted regarding situation of flood.

1	At 10.00 am for information of 7.5 meters (89.42 ft.) level
2	At 10.05 am for information of 8.5 meters (92.71 ft.) level
3	At 10.10 am for information of 9.5 meters (96.00 ft.) level

Citizens are advised to note that Siren blown on...../...../..... date is only as mock drill so that during actual emergency people can easily recognize the indication of various types of Siren blown.

## CHAPTER - 5

### **Pre-Monsoon Contingency Plan (SOP)**

To cope up with possibility of heavy rains, flood and natural calamities, Standing Instructions for Pre-Monsoon works to be carried out at every year.

#### **All Departments / Zones :**

1. Time schedule should be prepared for refilling / repairing of excavated trenches. Priority should be given to trenches on the heavy traffic roads / main roads. **(All ZO / Ex.Eng. - RDD / HE / Drng. Engr.)**
2. Keep the necessary stock of fuel for dewatering pumps, generator sets, vehicles / machinery. Necessary stock should be provided to all Zonal office / fire stations etc by 15th June 2025. (under annexure or Patrak -11) **(All ZO / Ex.Eng. - Workshop / CFO / Drng. Engr )**
3. Necessary steps should be taken immediately to remove the contamination in the drinking water due to leakage of drainage / water supply lines. As part of hygienic measures, in case of contamination of water lines, dispatching of water tanks for providing pure / potable water should be arranged for the affected areas. Steps should be taken for distributing chlorine tablets and for sending medical team of the Surat Municipal Corporation. If needed, for new area, these arrangements should also be made. **(All ZO / MOH / HE / Drng. Engr.)**
4. Tender procedures for appointing the agency for carrying out activities related to premonsoon and during monsoon period & purchasing of required materials should be immediately done. **( All HOD)**
5. The excavation work carried out by Gujarat Gas Co., Reliance Telecom, Torrent Power Ltd., GSEB, Telecom department and other private agencies should be completed by 20th May 2025. A Zone wise list should be prepared for the same after survey and concerned agencies should be informed in writing to complete the trench filling by 30th May 2025. **(All ZO / Ex.Eng. - RDD / HE / Drng. Engr.)**
6. A list containing the details of the no. & types of vehicles, their keys, names & addresses of drivers, their contact no. etc should be kept ready in all Zone offices & concerned departments. The copy of the same should be submitted to the Office Superintendent by 1st May 2025.( annexure - 1 ) **( All ZO / Ex. Eng.- Workshop / Concerned HOD / CFD )**
7. All the applications for water and gutter (drainage) connection should be checked up and procedure for approval should be completed. The approved works should be completed by 20th May 2025. **(All ZO / HE / Drng. Engr.)**
8. In case of power failure due to heavy rains, the generator sets should be kept in working condition so that the sewage pumping stations and water distribution centre remain is working condition. The capacity wise information regarding such generators should be submitted to the Office Superintendent. **(All HOD)**
9. The necessary equipment including the dewatering pumps for the disposal of water in zones including new areas, generator sets, petromax, portable lights, ropes etc should be arranged to be keep at fixed places. **(All ZO / HE / Drng.Engr.)**
10. For making easy availability of swimmers for rescue operations during floods, a latest list of names, addresses telephone number etc of swimmers and their institutions and for areas newly included in the corporation, the same details of the local persons should be prepared and kept with the zonal control office and their copies should be supplied to the Office Superintendent and all zonal officers by 1st May 2025. ( as per anneture-6) **(All ZO / CFO / HE / Manager - Culture )**

## DISASTER MANAGEMENT AND PREPAREDNESS PLAN

11. During heavy rains / floods, necessary arrangement for the distribution of food packets should be made. The latest details of the food packet suppliers and NGOs should be submitted to all zonal officers/ chief accountant / chief project officer (UCD), Food inspectors / Curator (culture) & to the Office Superintendent by 1st of May 2025.( As per annexure - 4) ( **All ZO / CFO / Chief Acct / UCD / Food Insp. / Manager - Culture**)
12. Due to heavy rains / floods epidemic may start. To cope up with the situation, arrangement should be made to keep sufficient stock of necessary medicines and insecticides in Hospitals / Health centers. Fogging machines should be kept ready and procedure for purchasing new should be arranged if needed. The arrangement for rapid disposal of dead animals should also be made. ( **MOH/ All Dy. MOH / I/C Ex.Eng - SWM / IO**)
13. Generators / Petromaxes / Emergency lights should be checked to verify their working condition to avoid the block out at Zonal Office. ( **All ZO**)
14. Special Precaution should be taken to shift the generator sets & their fuel from the ground floor to a level higher than the H.F.L. noted in year 2006. ( **All ZO** )
15. For speedy contact in times of need during monsoon list of employees along with the names & addresses of all officers cadre wise / employees should be kept ready in all the zones / departments and one copy should be sent to the Office Superintendent by 1st May 2025. (As Per Annexure-2) ( **All ZO / HOD** )
16. The total number of required daily wages beldars (worker) for the Pre-Monsoon work should be sent to the Establishment department employment department. ( **All ZO / Drng. Engr. / HE** )
17. Separate data for urgent work to be prepared during the monsoon & should be kept ready by concerned zones / departments in fixed annexure and a copy along with a soft copy (Pen Drive) should be sent to the central office by 1st May 2025.
18. Whatever changes / suggestions to be made in disaster management plan prepared last year should be sent to the central office in fixed proforma by 1<sup>st</sup> April 2025.( **All HOD** )
19. The excavation work for water supply / drainage pipe line works should be completed and should be made safe by 20th May 2025. If needed in special areas / cases, the excavation can be carried out only with the prior permission of Municipal Commissioner of Surat Municipal Corporation only. ( **All ZO / HE / Drng.Engr.**)
20. The newly installed flood gates should be serviced well in time for smooth operation. Repaired certificate showing that they are in working condition along with the name of the operator should invariably be submitted by 15th May of every year. ( **All ZO /HOE**)
21. De-watering pumps and generator sets should be serviced & should be kept in working condition and log book should be properly maintained. ( **All ZO / HE / Drng.Engr.**)
22. The central control room one at ICCC (Udhna - Magdalla Road) and separate control room in each zone should be started from 1<sup>st</sup> June or first rain whichever is earlier. ( **All ZO / CFO** )
23. Fax machines installed by the zones / department for exchange of information should be repaired / serviced so that they can work continuously during emergent times. Enough stock of Fax rolls / additional papers should be kept ready. ( **All ZO** )

## DISASTER MANAGEMENT AND PREPAREDNESS PLAN

### All Zones :

1. All zones / departments should keep a ready stock of minimum 2000 bags of sand. (All ZO)
2. Out of the relief centers / concerned schools should be repaired, if needed. The toilet blocks, water & lighting facilities of the schools / centers should be checked and appropriate steps should be taken if needed. The information regarding these matters should be sent to the Office Superintendent by 1st may 2025. ( as per annexure-5) **(All ZO)**
3. A list of low lying areas where water accumulates due to heavy rains should be prepared and necessary steps should be taken to stop such accumulation. For newly included areas, such type of water accumulation had taken place in the past, information regarding the arrangement for its disposal in the past should be gathered and steps should be taken through short / long term plans for disposal of such water. (All ZO)
4. All control rooms and relief centers in the area affected due to the heavy rains, river floods, Khadipoor should have updated zone maps of size 42' X 60' with updated information of contact Nos. / Mobile Nos. Three copies of the same should be sent to central office **(All ZO)**
5. Transition routes to be used during disaster from affected areas to the relief centers should be planned in advance in all zones. **(All ZO)**
6. Water recharging bore wells in SMC area should be checked and cleaned to make it operational. **(All Z.O.)**
7. A survey of the open plots where water accumulates and owners of the private plots should be notified by 15th May 2025 for filling them and proper steps should be taken that water does not accumulate in the plots. Special precautionary measure should be taken for the newly included areas. **( All ZO )**
8. Arrangement for regular cleaning of the garbage and mud should be made during heavy rains. **(All ZO )**
9. Arrangement for cleaning of creeks, nalas, drainage (Gutter) etc including these in the newly added areas should be made. **(All ZO)**
10. Arrangement for occupying necessary spaces / place / building in new areas for installing communication means, wireless sets, phones etc should be made **( All ZO / HOD )**
11. Training regarding relocation should be given to volunteers to transit to safe areas during flood disaster. Group of 50 to 100 houses should have such trained volunteer especially in slum area. **(All ZO / CPO-UCD)**

### All Zones / Drainage Departments:

1. Storm water and Box drain should be cleaned well. The information as per the enclosed statement-A is to be submitted in every meeting regarding the length of the storm water and box drains cleaned / yet to be cleaned out of the total length. Supervision should be made intensive for effective cleaning. **(All ZO / Drng.Eng.)**
2. The storm water drain, box drain, katcha / temporary local drains, manholes, Jalia, & half round pipes, inlet chambers etc should be cleaned. New frame covers (lids) should be fixed on manhole without lids and the covers which are found broken should be replaced. A survey of the drainage line manholes should be made and a list should be prepared. The information should be submitted in the weekly meetings as per statement-A. **(All ZO / Drng.Eng.)**
3. Actions should be taken to dig temporary drains at places where water accumulation usually takes places. Special care regarding this should be taken for the newly added areas. **( All ZO)**
4. Action should be taken regarding purchasing / hiring heavy duty (big size) dewatering pump. **(Drng.Eng./Workshop)**

## DISASTER MANAGEMENT AND PREPAREDNESS PLAN

5. To make necessary arrangements for making available the dewatering pumps whenever required, to sent the information about the size wise number of dewatering pumps and certificate regarding the functioning of them should be sent to office superintendent by 20<sup>th</sup> May 2025 (as per Annexure-12 in Gujarati and English) ( **All ZO / Ex.Eng.Drg./Hyd.**)
6. Necessary equipments like dewatering pump, generator sets, petromixes, portable lights, and ropes should be kept as fixed placed for disposal of water in new areas. ( **All ZO**)

### **All Zones / Road Department :**

1. Road should be repaired so that there should not be any difficulty for the running of vehicles. ( **Ex.Eng.- RDD/ All ZO**)
2. The necessary arrangement of materials like bitumen, hard murrum, chhara, grit, metal, bricks, sand & diesel should be stocked to start immediate local work on the roads damaged due to heavy rains. ( **All ZO / Ex.Eng.- RDD**)
3. Traffic should not be affected in areas where bridge, flyover bridge, ROB area under construction. In such area roads should be properly leveled & encroachment should be removed. ( **Ex,Eng.Bridge Cell / All ZO**)

### **All Zones / Town Development Departments :**

1. Actions should be taken to remove the building materials of the ongoing construction work lying on the roads in the city. The Town Development officer should timely advertise the matter in the local newspapers. The material should be lifted and penalty should be charged to owners, if they do not pay the charges & if needed notice should be given. ( **All ZO / TDO**)
2. A survey of the dilapidated (Bismar) building likely to fall down / collapse due to heavy rains should be made by 20<sup>th</sup> May 2025. A list of the same should be sent to Town Department officer and steps should take for their reparation and demolition. ( **All ZO / TDO**)

### **All Zones / H.W.W. / Street Lights Department :**

1. Arrangements for repairs & cleaning of High Mast Tower / Street light covers / fitting should be done. ( **All ZO / Ex.Engr. - St.light** )
2. Steps should be taken for placing junction box on the street light poles and Programmable Control Penal ON / OFF (junction) of the street light, at appropriate height, in accordance with the new H.F.L. ( **Ex. Engr.- St. light** )
3. Arrangement for availability of wiremen along with necessary instruments / equipments should be made for the emergency period. ( **All ZO** )
4. The rate of rent for hiring generators should be fixed and names, addresses, phone numbers etc of concerned agencies should be sent to Office Superintendent. ( **Ex. Eng. HWW**)
5. The repainting of the level marking to observe the water level of Tapi at Hope Bridge, Nehru Bridge, Vivekanand law level Bridge, weir cum cause way and bridges on the creeks should be done. Necessary light arrangements should also be completed by 15<sup>th</sup> May 2025. ( **Ex. Engr - Traffic / Ex. Eng - St. Light**)
6. The details / information regarding the availability of the generator sets required during power outage due to heavy rain, at all zones/concerned departments/division should be collected. compiled and sent by Executive Engineer (Streelight) to office Superintendent. ( **Ex. Engr - St. Light**)

## DISASTER MANAGEMENT AND PREPAREDNESS PLAN

### All Zones / Workshop Department / Establishment :

1. Procedure for purchasing / hiring of heavy duty huge size dewatering pumps as per requirements should be made. ( **Ex.Eng. - Drg. / Workshop** )
2. De-watering (with foot-valve) for delivery pump should be kept ready wherever needed. (**Ex. Eng/Drg/Workshop**)
3. To make arrangement for providing dewatering pumps in working condition when required; the information about availability of the number of dewatering pumps along with their locations, capabilities and working condition certificate should be submitted to the Office Superintendent on 20<sup>th</sup> May-2025( **as per annexure - 12** ) (**All ZO / HE / Drng.Engr.**)
4. Arrangement should be made for maintenance of Fire / Workshop equipments / vehicles to keep them in working condition. ( **CFO / Engr. - Workshop** )
5. For easy availability of Earth movers / machinery / heavy vehicles, the names, addresses & telephone no. of (supplying) contractors / organization (industrial unit of Hazira area / other contractors etc) should be sent to the Office Superintendent by 1<sup>st</sup> May 2025. ( **as per annexure - 7** ) (**Ex.Engr. Workshop**)
6. Arrangement should be made for temporary staff, equipment, vehicles for the cleaning of zone. (**Ex.Engr. Workshop, Po(Est)**)

### All Zones / Hydraulic Department / H.W.W. / Drainage :

1. Arrangement should be made for water tankers when water supply is disturbed due to heavy rains. A list containing the information regarding the number of tankers the corporation have and also the contractor and other license holders who can supply tankers on rent, whom to contact for this purpose their telephone numbers etc should be sent to the Office Superintendent within the 7 days. The newly included areas should specially be covered regarding this also. ( **as per annexure - 7** ) (**HE**)
2. Protection walls should be checked & necessary procedure should be carried out for repairing if needed. If it is necessary to inform the Government, a letter should be written and arrangement should be made to see that the concerned department follows up the matter. (**All ZO / HE**)
3. The information for necessary number of daily wages beldars (worker) for pre-monsoon work should be sent to Establishment department. (**All ZO / Drng.Engr. / HE** )
4. Executive Engineer (HWW) should make necessary arrangements for making available the dewatering pumps whenever required and should collect, compile and send the details/information regarding the availability of dewatering pumps of different sizes with all zones departments to office Superintendent by 20<sup>th</sup> May 2025 (**as per Annexure-12 in Gujarati and English (All ZO / Drng.Engr. / HE )**).
5. Executive Engineer (HWW) should collect, compile and send the details/information regarding the availability of dewatering pumps of different sizes with all zones/departments required to make available these dewatering pumps whenever required. The information should to send to office superintendent by 20<sup>th</sup> May 2025 (**as per Annexure-12 in Gujarati and English (E.E. HWW)**).

### Traffic department :

1. The repainting of the level marking to observe the water level of Tapi at Hope bridge, Nehru bridge, Sardar bridge, Vivekanand low level bridge weir cum causeway & other bridges on the creeks should be done. Necessary light arrangements should also be completed by 15th May 2025 of every year. (**Ex.Engr.- Traffic / E - St. light** )

### Garden Departments :

1. Arrangement should be made to cut / remove the trees fallen during the cyclone. Private agency should be appointed for this purpose. Such arrangement should be made for Newly areas also. (**Ex. En. PPG / GS**)

## DISASTER MANAGEMENT AND PREPAREDNESS PLAN

### All Zones / Fire Bridge Department / Public Relation Department / Watch and Ward Department :

1. Arrangements of the boats for low lying areas suffering from accumulations of water should be made for rescue operations. Planning in advance for location of boats during floods should be done in coordination with the zonal officers. Information regarding the locations and their number of boats, rafts and Sirens should be provided. Procedure for the approval of extra boats to be hired for rescue operations should be done. Special care should be taken to do the same regarding the newly annexed areas of the corporation. **(All ZO / CFO )**
2. For rescue and relief operations during the emergent times of flood, from where and from which institution which type of boats and capability will be made immediately available? The detailed information regarding this should include the names / status / (mobile) phone no. of the control officer & senior officers of the said organization should be prepared & a copy of the same should be sent to the control office and the central control room. **(as per Annexure-9 in Gujarati and English) (CFO)**
3. For shifting of all the boats to be available for rescue / relief operations in the affected area, cranes would be required. So information about the cranes, their size, their weight, lifting, capacity, the necessary trucks / trailers, their size and location from where it will be available and it should be prepared along with the their names, addresses, status (mobile) phone number etc of the control person / officers should be prepared and a copy of the same should be send to the central office. **(as per Annexure-10 in Gujarati and English) (CFO)**
4. Actions should be taken for necessary repairing / maintenance of all Wireless sets / Walky Talky sets. Necessary Arrangments should also be made for keeping important telephones continuously in working order. **( CFO )**
5. Necessary arrangements for warning the public regarding the flood through Public address system & for blowing of sirens should be made. **( CFO / PRO / All ZO )**
6. The public relations officer should get the information regarding, their arrangements and should prepare a coordinated press note under the guidance of Deputy Commissioner & send it to the press. **(PRO / All ZO )**
7. Fire brigade / workshop equipments / instruments & vehicles should be serviced / maintained to keep them in working condition. **(CFO / Ex.Engr.- Workshop )**
8. Necessary arrangement should be made for occupying space / place / building for communication, wireless sets, Phones etc for new areas. **(CFO)**
9. Places should be identified keeping boats in time for rescue operations to be done from the places which are submerged under water. **( CFO )**
10. Extra batteries should be supplied as per need so that all wireless sets / walky tokies can be continuously operated. **( CFO )**
11. Actions should be taken to place battery wall charger at zone offices and main office so that mobile phone of all officers / employees can be kept continuously working.**( CFO )**
12. To minimize the loss of life and damages to property and to ensure restoration and rehabilitation.**( CFO )**
13. To illustrate a concise chart, listing major executive actions required in response to urban flooding**( CFO )**
14. To list necessary tasks for preparedness, response relief and restoration required to be undertaken by the line agencies and department involed.**( CFO )**

## **DISASTER MANAGEMENT AND PREPAREDNESS PLAN**

15. To ensure effective integration of tasks / events of each department at every stage of the disaster management process and enable continuous coordination of all action.( **CFO** )
16. To enable reporting of action taken by each agency / department for further review and updating of the existing sop from past learning.( **CFO** )
17. This model sop is an indicative SOP document issued for the guidance of states and UT administrations for preparation of their city specific SOPs. The instructions contained in this model SOP should not be regarded as exhaustive of all the action that might be considered necessary.( **CFO** )
18. Emergency Traffic Plan - Being Familiar With The Local terrain, W &W has to provide security for safe transporting of employee, resources and relief goods to and from the affected area.( **CSO** )
19. Detail Communication plan - Watch & Ward Has a robust and effective communication System. it should be used to propagate information and warning of threatening disaster Security guards / marshals who are present at affected area play important role to collect sensitive information and disseminate emergency warning and other information. ( **CSO** )
20. Search and Rescue (SAR) - The primary Function During a disaster. Security Guards / Marshals must begin rescue at the earliest to take relief to the victim till specialized forces arrive. ( **CSO** )
21. Deployment of Resources - Watch & Ward Should Deploy Resources, Provide Safety And security to the resources so that information of any emergency could be disseminated quickly and support reached at the earliest. similar communication with wireless has to be established in operational camps. ( **CSO** )
22. Prevention of Commission of cognizable offences including all offences against property, human body and public tranquility - provide safety by active patrolling during disasters.( **CSO** )
23. Accommodation of persons with special needs in evacuation shelters such as small children, pregnant women and mothers with nursing infants etc. in a limited shelter space it is very important to provide very important role in this respect.( **CSO** )
24. Restoration of critical infrastructure - Disaster usually affects the critical infrastructure such as road, telecommunication, health centers, school, electricity supply etc. W &W has to provide protection to the which are involved in Restoration of such infrastructure.( **CSO** )
25. Safe exit of the personnel involved in disaster management - After the disaster for the safe exit of the personnel from outside agencies involved in management of the disaster i.e. People from NGOs, INGOs, medical teams etc.( **CSO** )

### **All Zones office / Municipal School Board :**

1. For starting relief centers at the time of heavy rains and flood, a latest list of all the schools building along with the names and addresses of Principals & their details should be kept ready at zone offices and a copy of the same should be submitted to the Office Superintendent by 1st May 2025. A survey should be made to find out centre for relief work for areas newly included in the corporation. ( **All ZO / AO - MSB** )
2. When water submergence takes place in residential areas or at times of flood when schools are to be used as relief centres the information regarding the names, addresses, phone no. etc of the concerned schools principals should be sent to the zonal officers & office superintendent. A circular should be sent to the effect that at such times the principals of concerned schools remain present and are available and they do not go on

## DISASTER MANAGEMENT AND PREPAREDNESS PLAN

leave without the permission of the Administrative Officer. (All ZO / AO - MSB)

### **Information to be sent by Departments / Zones :**

1. For urgent work during heavy rains, cyclone, a list containing the details of the number of vehicles, their types, their keys, names and addresses of their drivers, their contact phone no. etc should be kept ready in all zone officers and concerned departments. A copy on USB pen drive of the same should be submitted to the office superintendent by 15th April every year.
2. For speedy and easy availability of the employees in time of need during monsoon, a list of the name & addresses of all cadre wise officers / employees / beldars, cleaners etc should be kept ready by 15th April every year in all zones / departments and a copy and a USB pen drive of the same should be submitted to the office superintendent.
3. For starting relief centres at times of heavy rains & flood, a zone wise latest list of schools should be prepared by the Administrative Officer - MSB containing information about the names, addresses of the principals of the concerned schools and of the key holders and should be sent to the every zone office / and a copy along with a USB pen drive should be submitted to the office superintendent in 15th of April every year.
4. During the heavy rains / floods necessary arrangements for the distribution of food packets should be made. The latest details of the suppliers of food packets / NGOs should be submitted all zonal officers / chief accountant / chief project officer (UCD) food inspector / curator (culture) to the office superintendent by 15th April.
5. All the zonal officers should arrange for the checking whether proper facilities of lights, water & toilets are available or not at the fixed relief centres in every zone. This information and its USB pen drive should be submitted by them to the office superintendent by 15th April every year.
6. For easy availability of swimmers for rescue operations during floods. Hydraulic Engineer / Chief Fire Officer / Manager(culture dept.) / all Zonal Officers should prepare a latest list of the names, addresses & telephone no. etc of swimmers & their organization & should submit the latest list and a USB pen drive by 15th April to the office superintendent.
7. Hydraulic Engineer should make arrangement for supplying water high tankers when water supply is disrupted in the city due to heavy rains. A list of containing the information regarding the number of tankers the corporation has as also a list of the contractors and other license holders who can supply tanker on rent with their names, addresses, telephone no. should be submitted by him to the central office.
8. For easy availability of Earth mover / machinery / heavy vehicles, the names, addresses & telephone no. of (suppliers) contractor / organizations (industrial units Hazira Area / other contractors) should be sent Ex.Eng. - Workshop / chief fire officer to the office superintendent by the 15th April.
9. The information required by the Collector's office regarding the various safety relief equipments / vehicles should be submitted to the central office within scheduled time limit.
10. The details of the rescue, relief & rehabilitation should be submitted to the central control room.
11. The details should be prepared by zones / departments regarding the location of floodgates, the name of the operators, the location of the keys, the name and contact no. of the responsible officer etc for timely operating the floodgates during the floods & the same should be sent to the office superintendent by 15th April.
12. The details regarding the name of the organization, their location & contact no. of the organizations officer for

## DISASTER MANAGEMENT AND PREPAREDNESS PLAN

obtaining boats & transport vehicles & to be made available during emergencies should be prepared by Chief Fire Officer & should be sent to the Office Superintendent by 15th of April.

13. The Chief Fire Officer should send the information about organization from which cranes can be made available on rent in emergent situation in how many number & capacity & from which locations to office superintendent by 15th of April.
14. All the zones / departments should send the details regarding the no. of generators sets and their capacity to the office superintendent by 15th April.
15. All zones / department should submit the information regarding the capacity / no. of dewatering pumps to office superintendent by 15th April

All information prescribed in the example letter – A and all the details/information in example letter 1 to 12 should be sent in file. PRE MONSOON-2025 in the folder FTP://10.11.1.2 / OS in the given format and the hardcopy of the same should be sent to central office without fail.

## CHAPTER - 6

### Prevention of Water borne and Water related Diseases

The concerned department will have to submit the information in the annexed proforma regarding the precautionary steps taken to see that water borne and water related diseases do not occur in summer and also regarding the actions for preventing the possible epidemics as per the included action plan as follows.

#### Section - 1

##### **A. Health Sanitation and Solid Waste Management**

All the Deputy Medical officer of health should carry out the following works in their zone areas.

1. Intense cleaning of nuisance spots, garbage bins / Public Toilets Pay & Use along with their surrounding areas should be regularly carried out. All types of wastes should be regularly disposed off. sufficient quantities of Insecticides Should be there in stock in each ward office
2. The use and selling of Single used plastic are banned under the Environment Protection Act - 1986 and the Solid waste Management rules 2016 & PWM (Plastic waste Management) Rule 2023. Hence, arrangement should be made to completely stop their use by fruit / vegetable hawkers etc. Regular checking should be carried out and necessary steps should be taken against those violating the rule.
3. Arrangement should be made to stop the prevailing use of small pieces of plastic sheets / polythene by pan hawkers / vendors. Regular checking should be carried out and necessary steps should be taken.
4. If the citizens in the ward areas throws the Waste / garbage on roads they should be first instructed to dispose the waste in door to door vehicle after segregating it only. If there is no improvement in their behavior, notices should be issued to them. In case, they do not pay attention to the notice, legal complaint should be registered against them in the Municipal court.
5. The drainage line of public toilet should never be blocked / choked up. If it is so, the blockage should be immediately removed and the line should be cleaned and insecticide should be sprayed in the surrounding areas also. Intensive supervision should be carried for the cleanliness of Pay & Use toilets & spraying of Insecticides.
6. Shopkeeper, shopping centre, Commercial Complex, mall etc. organizer must keep 2 dustbin, one green coloured for wet waste and second blue coloured for dry waste to collect segregated waste and Each Shopkeeper, shopping centre, commercial complex, mall etc when organizers open their shop/ company/ Shopping centre/ commercial complex should not throw garbage on road or footpath in front of thaeir shops, they must compulsorily give the segregated waste to door to door garbage vehicle.
7. The complaints regarding overflow drainage line should be resolved by the nearby ward-office. If there is a damage in the main drainage line then the work should be done in collabration with the pumping station. If drainage chamber/line/ down take pipe are damaged then the responsible person should given the notice as per the BPMC Act.
8. Where the Drainage line is not available and complaints regrading overflow of soak pits/septic tanks are received than it should be registered regularly. Such complaints are appropriately attended and immediate actions should be taken for timely discharging the soiled water.
9. The water storage tanks of the public places such as municipal and private schools, colleges, universities, bus station,

## DISASTER MANAGEMENT AND PREPAREDNESS PLAN

religious places, commercial organizations, marriage halls & multi storied building, etc. should be regularly checked. Written notices should also be issued to their management committees / property holders for taking necessary steps to keep the water potable. Arrangement should be made to see that the areas around these place / organizations are kept clean. The concerned employees / representatives should also be instructed to submit a certificate showing the details of the dates of cleaning of their water tanks and use of bleaching powder.

10. Daily each ward office should take 10 water samples from the domestic water supply line and it should be tested for residual chlorine with the help of chronoscope provided to the ward offices. Out of these 5 samples should be taken from fixed locations such as public stand post, slum areas etc. and the remaining 5 samples should be taken from random locations. If the amount of residual chlorine is found less than the limit prescribed by GPCB or nil, the Prosecution Inspector & Hydraulic Engineer should be directly informed. Daily testing of water of such locations should carry out till the results are satisfactory. Chlorine tablets should be distributed to maintain the residual chlorine concentration up to the limit prescribed.
11. In the ward areas, if any leakage /contamination in water supply are found, the concerned department should be informed and repair work should be carried out immediately & a report as per the proforma should be made.
  - ❖ Complaints of water leakage / contaminated water / turbid and odorous water should be immediately attended.
  - ❖ Detection of leakage & repairing work of the water line should be carried out on war footings.
  - ❖ Supplying drinking water tanker in the affected areas. Potable Water should be supplied by tankers till the affected areas leakage/ contamination of water problem is solved.
  - ❖ Water line in the areas of complaints regarding contaminated water should be instantly disconnected and should be taken care to see that contaminated water is not supplied.
  - ❖ A register should be kept for the leakage / contaminated water complaint and repairing of the water line. The day to day information of the same should be saved in the computer. Responsible employee and officer should check the register daily.
  - ❖ The samples of water should also be sent for bacteriological / viral analyses. A copy of report should be sent to office in charge.
  - ❖ Arrangement should be made to repair water line leakage immediately & proper check should be carried out so that the repair work may continue round-the-clock when needed.
12. Arrangement should be made for the use of chlorine tablets for the drinking water supplied to public through parabs.
13. The use of drinking water pouches and drinking water bottles without BIS mark should be completely prohibited.
14. Arrangement be made to destroy the soiled & decayed fruits sold in ward areas.
15. Lorries selling foods/eatables.
  - 15.1 Checking of lorries selling foods / eatables should be made intensive, water samples of these lorries should be collected and sent to laboratory for analysis.
  - 15.2 The lorries selling foods / eatables should be forced to cover the items with fly protecting nets.
  - 15.3 Care should be taken to keep the space around the food lorries clean.
  - 15.4 The use of disposable glasses & plates(other than prohibited plastic and thermocol) should be made compulsory for them.
16. Cold-drinks lorries-Ice-Gola, Sugar cane Juice.
  - 16.1 The factory must be checked which are sell ice-gola, coloured sarbat, kulfi and pepsi and if it is necessary to

take sample for lab test.

16.2 The water used in ice making factories should be regularly checked.

16.3 The hawkers selling sugarcane juice should be compelled to use disposable glasses only. They should be instructed to collect waste in jute bags. Care should be taken to control the nuisance of flies around such places.

17. Arrangement for checking stored water and water distribution system at places such public conference, marriage events or places where a large no. of people gather together should be done. They should be informed to see that food / eatables should not become unhygienic.
18. Care Should Be taken to see that water storage tanks at public places like gardens swimming pools, cinema halls, auditorium, bus station, colleges and other organizations Should regularly be cleaned. A record of the same should be maintained.
19. Information regarding water borne & water related diseases should be collected from the private practitioners designated as santinel centres and should be submitted to the statistical department ( central office )
20. Proper attention should be paid to the cleaning of open drains for the disposal of segregated solid waste, domestic hazard dust and nuisance spots and also to the spraying of necessary insecticides.
21. All mutton / beef / fish / vegetable / fruit markets should be cleaned and washed with phenyl and if uneatable items being sold there should be destroyed.
22. To make anti-Fly activity rigorous, necessary measures should be taken for proper sanitation in all wards. The activity should be done keeping the breeding spots of flies in mind. (spots like dustbin, garbage piles, cow dung heaps & disposable sites.)
23. Insecticides should be used generously in market areas and should maintain cleanliness to reduce breeding of flies.
24. Garbage from MSW, disposable site, MSW transfer station etc should be regularly disposed off and cleanliness should be maintained and insecticides should be sprayed regularly to stop breeding of flies.
25. Disposal of C & D Waste Should be done and administrative charge should be taken for the same.

### **B. Checking of Eatable / Non Eatables Food:-**

All food Inspector will have to make the following arrangements

1. Inspection of organizations selling food/eatable items should be done and unhygienic items should be destroyed. **(Action: Ch.FSO / Dy. MOH)**
2. Instructions should be issued to the organizations, Lorries/hawkers selling food/eatable items to use disposal paper Cups & Plates only. **(Action:Dy.MOH)**
3. The food/eatables sold by hawker/lorries should be inspected to maintain quality and if needed, the unhygienic food items should be destroyed and their selling should be stopped. **(Action:Dy.MOH)**
4. Written instructions should be given for the use of chlorinated water only for the food processing/selling units & organization and also ice & cold drink factories. Occasional checking should be done for the purpose & water samples should be collected from these factories and sent to laboratory for analysis & Check up. **(Action: Ch.FSO)**
5. Written notes/warnings/notices should be issued to the owners of organization selling food/eatables for inferior quality as per PFA Rules & Regulations. Samples should be taken from them for this purpose. Complaints should be made in case of violation of any condition of the license. Implementation of licensing conditions should be ensured. Inspection notes should be variably be made by the inspector on his visits, in appropriate column of the license. **(Action: Ch.FSO)**

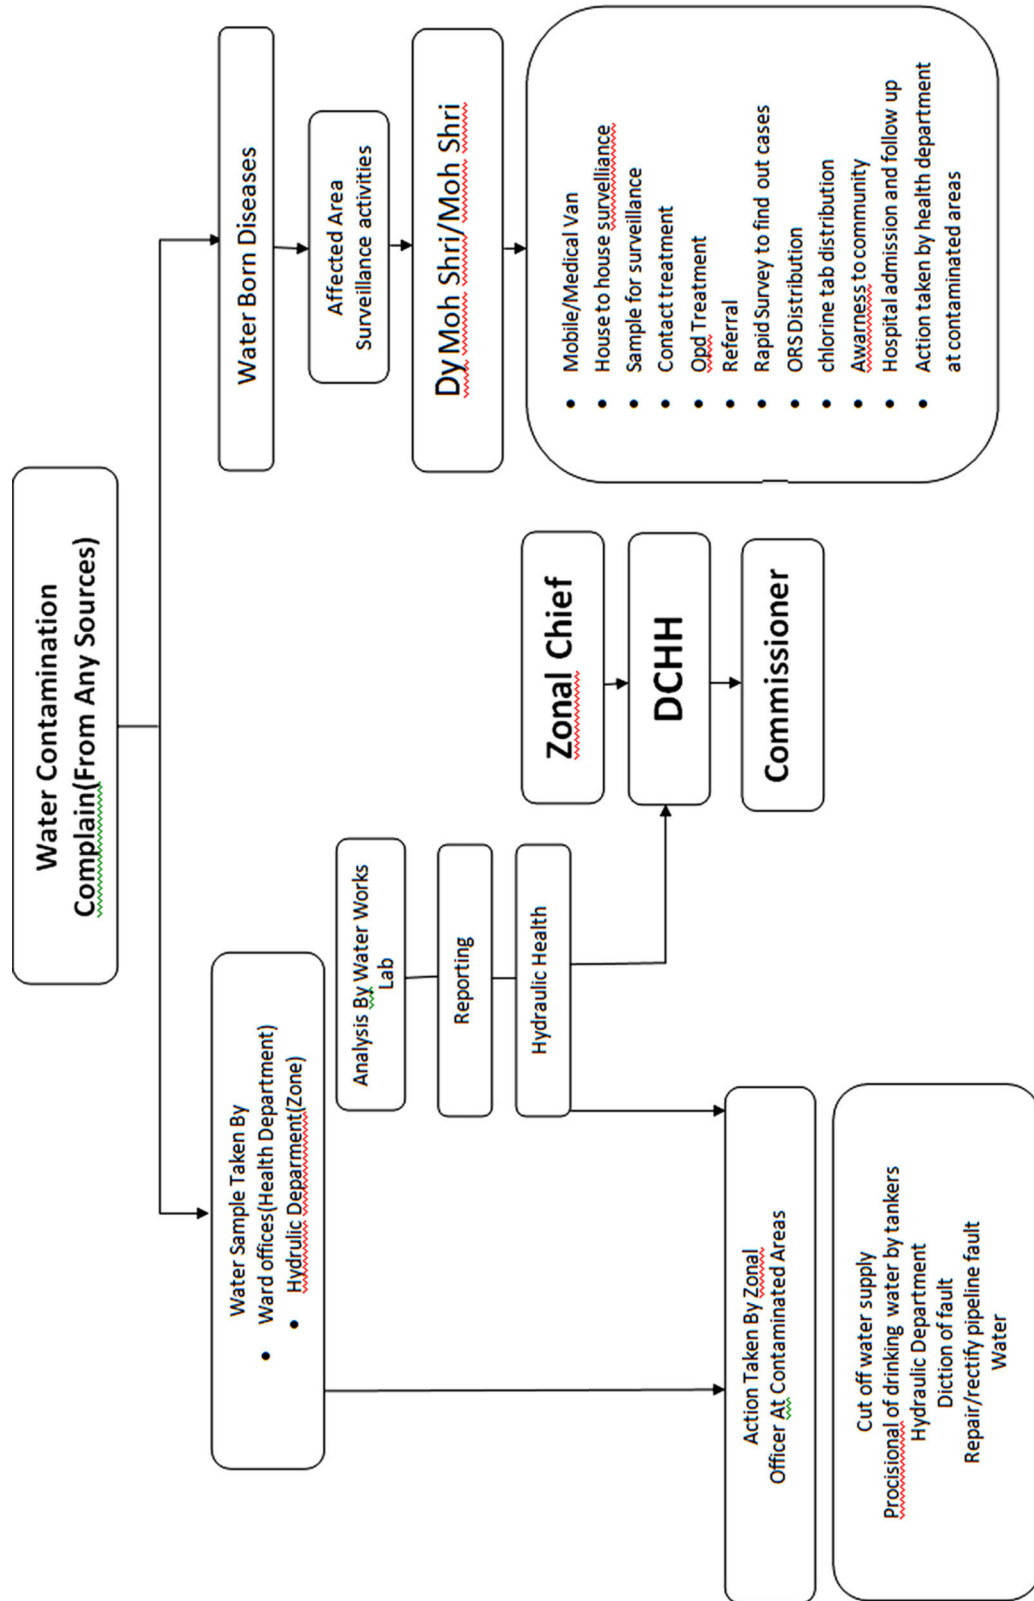

6. To check the Hotel & Restaurant for Health & Hygienic condition & do needful action as necessary. **(Action: Ch.FSO /Dy.MOH)**

**C. Water Quality Monitoring**

1. When the Complaint of contaminated water is received, Surveillance department should carry out the work in that area & chlorine Tablets should be Distributed.
2. Sample of the contaminated water should be taken for the lab testing from the complaining Area by Health Sanitation wards.
3. The complaint of contaminated water & leakage pipes should be checked by concerned department & try to solve that problem immediately.
4. For the awareness of the contaminated water necessary publicity should be done.
5. Any case of water borne & related disease observed in nearby area of urban health centre and private hospital whatever action taken should be reported to head quarter.

**Solid Waste Cell Section:-**

1. To work according to the highest standard of cleanliness.
2. During the transportation of waste from the refuge transfer station to the final disposable site, the waste should not fall on the road.
3. It has to be ensured that the sweeping machines used for night cleaning at all zones work smoothly.
4. It has to be ensured that there is adequate quantity of cleaning equipment at Rudrarpura depot.

### **Section-2**

#### **Market / Slaughter House Section:**

Market superintendent will have to carry out the following activities.

1. Regular inspection & General superintendence on Municipal Abattoirs including management and control, daily cleaning, disinfection and timely disposal of offal/ slaughter house waste.
2. To carry out drive against stray cattle menace causing impairment of vehicular and pedestrian traffic in jurisdiction of the Surat Municipal Corporation through cattle nuisance control cell (CNCC) so as to control cattle nuisance in the city. Initiate and take police and legal action against cattle owners for keeping their animals stray.
3. Handing over ownerless cattle of municipal cattle pond to the registered Panjrapoles for their lifelong maintenance.
4. To provide all logistic assistance and legal guidance to Dy.MOH of all zones on the matter of illegal slaughter of animals and unlicensed sale of meat in their jurisdiction so as to resolve the complaint satisfactorily and to stop this offensive act permanently.
5. To attend all matter pertaining to the policy decision of Municipal Markets, Abattoirs, Veterinary food Hygiene & Public Health, Zoonosis, Stray cattle and Cattle Pond issues, Animal Birth Control Program in stray dogs (Sterilization and Immunize them against Rabies) etc.

### **Section-3**

#### **Preventive, Promotive, Curative Services :-**

On duty Doctors of Maskati & Smimer hospitals and Medical Officers of Urban health centres & Urban Health Centres and Maternity Homes and CHC should carry out the following activities.

1. If more cases of water borne & water related diseases are found from any one particular area, the information should immediately be conveyed to the Dy.Medical Officer of Health (zone/vaccine) by phone / personally on the same day and a written & detail report should also be done.
2. If dehydration is noticed in case of AGE patients they should be admitted to maskati/smimer/UHC/CHC/50 Bed hospital. if cholera is suspected than the stool sample of all such cases should be sent for bacteriological/ culture tests by the Hospital-Medical Officer. The in charge of the pathological laboratory should immediately send a copy of the report to the MOH.
3. Arrangement of sufficient stock of all required drugs / medicines to cope up with likely situation of epidemic should be made.
4. Concerned medical officer should arrange to get the information from the santinel centres (private practioners) in his area and should visit it every fortnight to get the detail status of the epidemic.
5. Medical officer and CDPO of anganwadi should prepare the list of pregnant women and patients of dialysis for their respective area to be used at the time of disaster or at the time of flood. When informed, they should as such pregnant women and patients to shift to safe place / hospital.

## DISASTER MANAGEMENT AND PREPAREDNESS PLAN

6. All the medical officers should arrange for the disposal of biomedical waste, category wise, as per the Bio-medical waste (maintenance & handling) rules and should maintain its register regularly.
7. Patients having symptoms like cold cough, fever, throat pain, chest pain, breathing problem and the influenza (H1 N1) like symptoms should be treated as required by medical officer of all health centers and should be categorized under the state government guidelines and if needed, patients should be Referred for “throat swab” test in new civil/smimmer hospital and the health department should be informed the same.

### **Epidemic control Team (vaccine branch) will have to do the following activities.**

1. Arrangement for on the spot treatment of patient in case of possible epidemic should be made. Medical team including necessary doctors, nurses etc. should be kept ready. Arrangement for keeping sufficient stock of vaccine required for this purpose should also be made.
2. Surveillance activity in cases of various diseases should also be arranged.
3. Actions for health education of the public should be taken.
4. Statistical data of various diseases should be prepared with the help of statistical departments. the health officer should be helped in correspondence/ coordination work to be done with the private hospitals, clinics. RDD office, new Civil hospital, District Panchayat office, District Collector Office, & Government of Gujarat.
5. If there is complain of water contamination, than the Supervisor of the team should do chlorine test and collect water samples for bacteriological test.
6. In case of fever cases the team supervisor should take the slides, give medicines, and send the slides for testing to VBDC main office.
7. In cases Of hepatitis and Ac GE, the Supervisor should do the reporting in prescribed format to chief SI vaccine branch. chief SI vaccine branch should submit the reports of daily work through proper channel.

## CHAPTER - 7

### Vector Borne Diseases Control Department

#### Health related activities are following :

- Active surveillance and intra antilarval activity
- Engineering Measures
- Biological Measures
- Anti Adult Work
- Public awareness campaign

Under the guidance of the Municipal Commissioner, cooperation and involvement of various departments should be accepted in order to achieve this.

#### Responsibilities of Additional Insecticide Officer: -

1. Overall monitoring supervision and reporting work shall be done
2. Overall Monitoring/Supervision of the Operations of the Vbdc Dept of the Zone to ensure prompt implementation of all control measures in view of the abnormal changes in vector born diseases and to ensure timely, effective and result oriented entomological, cross checking, Plague surveillance, store, central lab and reporting operations at HQ level.

#### Responsibilities of Assistant Insecticide Officer:-

- The Assistant Insecticide Officer has accountability for all tasks completed within their designated area. Periodically supervision for effective input is necessary to make the active surveillance, anti-larval, anti-adult, and other vector-borne illness control efforts in the zone area successful and result-oriented. Each week, as needed, the Antilarval Supervisor will conduct a survey of the area designated for mosquito breeding, identify any prospective breeding sites, map them, and assign field workers to carry out source reduction, biological, or chemical control.
- To evaluate the state of vector-borne diseases in the zone, work with the private hospitals, hospitals, and laboratories in the area to gather information, classify it, implement control measures in the impacted areas, and take the necessary action to produce positive outcomes.

#### (A) Vector Borne diseases

- Active surveillance and intra domestic antilarval activity
- 1 The surveillance worker should collect slides from January to June, with a collection rate of 1.5% and a collection rate of 2% from July to December in the survey area.
  - 2 The Malaria Surveillance Worker Shall record the suspected cases of malaria fever in Every household and enter in his register. It should also sent to the medical officer of the nearest urban health centre.
  - 3 The surveillance worker should conduct an intra domestic survey of 10,000 people on a fortnightly basis on. In all water bodies locations other than those utilized for drinking water, sewage must be treated.
  - 4 Every patient who tested positive for malaria should be visited to provide RT at the recommended dosage and do follow up with the patient in accordance with the instructions, and keep track of the pertinent information.

#### Antilarval activity

- Antilarval Supervisor Survey of current and potential breeding sites for mosquitoes in his or her assigned area. Source reduction and bio chemical control should be done to stop the breeding of mosquitoes.

#### Engineering Measures :-

- Environmental manipulation like airtight closure, disposal of waste containers, fish release, fountain, open plot, it should

## DISASTER MANAGEMENT AND PREPAREDNESS PLAN

be done in coordination with the concerned engineering department of the zone.

- Dredging, desilting operations of creeks passing through the zone area as well as open drainage
- Cleaning of storm water inlet chamber at various S.T.P. Water treatment plant, gardening, vehicle depot, hydraulic depot and waste disposal activity within the time frame.
- Dewatering operation by dewatering pumps in open plots during the monsoon season where water cannot be drained by soil or drains.

### Biological Measures

- More hatcheries need to be developed and maintained in all zone and adequate monitoring of availability of fishes to be ensured.
- Permanent as well as temporary breeding spots in which carnivorous fish can live, biological control with carnivorous fish only and periodic monitoring.
- Surveying in Railway Washing Yard, ST Depot, other Govt and Semi Govt Premises for prevention of vector borne disease control. For necessary action concern nodal officer of premises as to be contacted by AIO.
- Operation of Guppy Fish Release in open plots during the monsoon season in plots where water cannot be drained.

### Anti Adult Work

- Fogging operation has to be done in the area of positive cases of Malaria and Dengue detected through Jamie's software.
- Carrying out effective fogging in and around 50 houses of Malaria Dengue or Chikunguniya positive cases and maintaining their register.
- Effective fogging and intra domestic as well as peri domestic operations should be carried out in the area related to the complaints received through the Municipal Sabhyashri social workers, leading citizens and grievance redressal system of Surat Municipal corporation.

### Public awareness campaign

In order to create public awareness for vector born diseases, IEC done in public places like colleges, schools, fairs and Mahila Mandals where housewives are present, Anganwadis, Voluntary Organizations, NGOs, Indian Medical Association, In contact with general practitioners in contact with Malaria workshops should be organized. In the next month of June, banners and posters will have to be put up in different important public places of the city showing the precautionary measures taken against malaria. Advertisements should be placed in local newspapers from time to time with information on malaria prevention in a manner that the general public can understand.

Public awareness campaigns should be carried out in different areas of the city by means of publicity vans. Organizing puppet shows and street plays in slum areas and imparting information about prevention of mosquito- borne diseases.

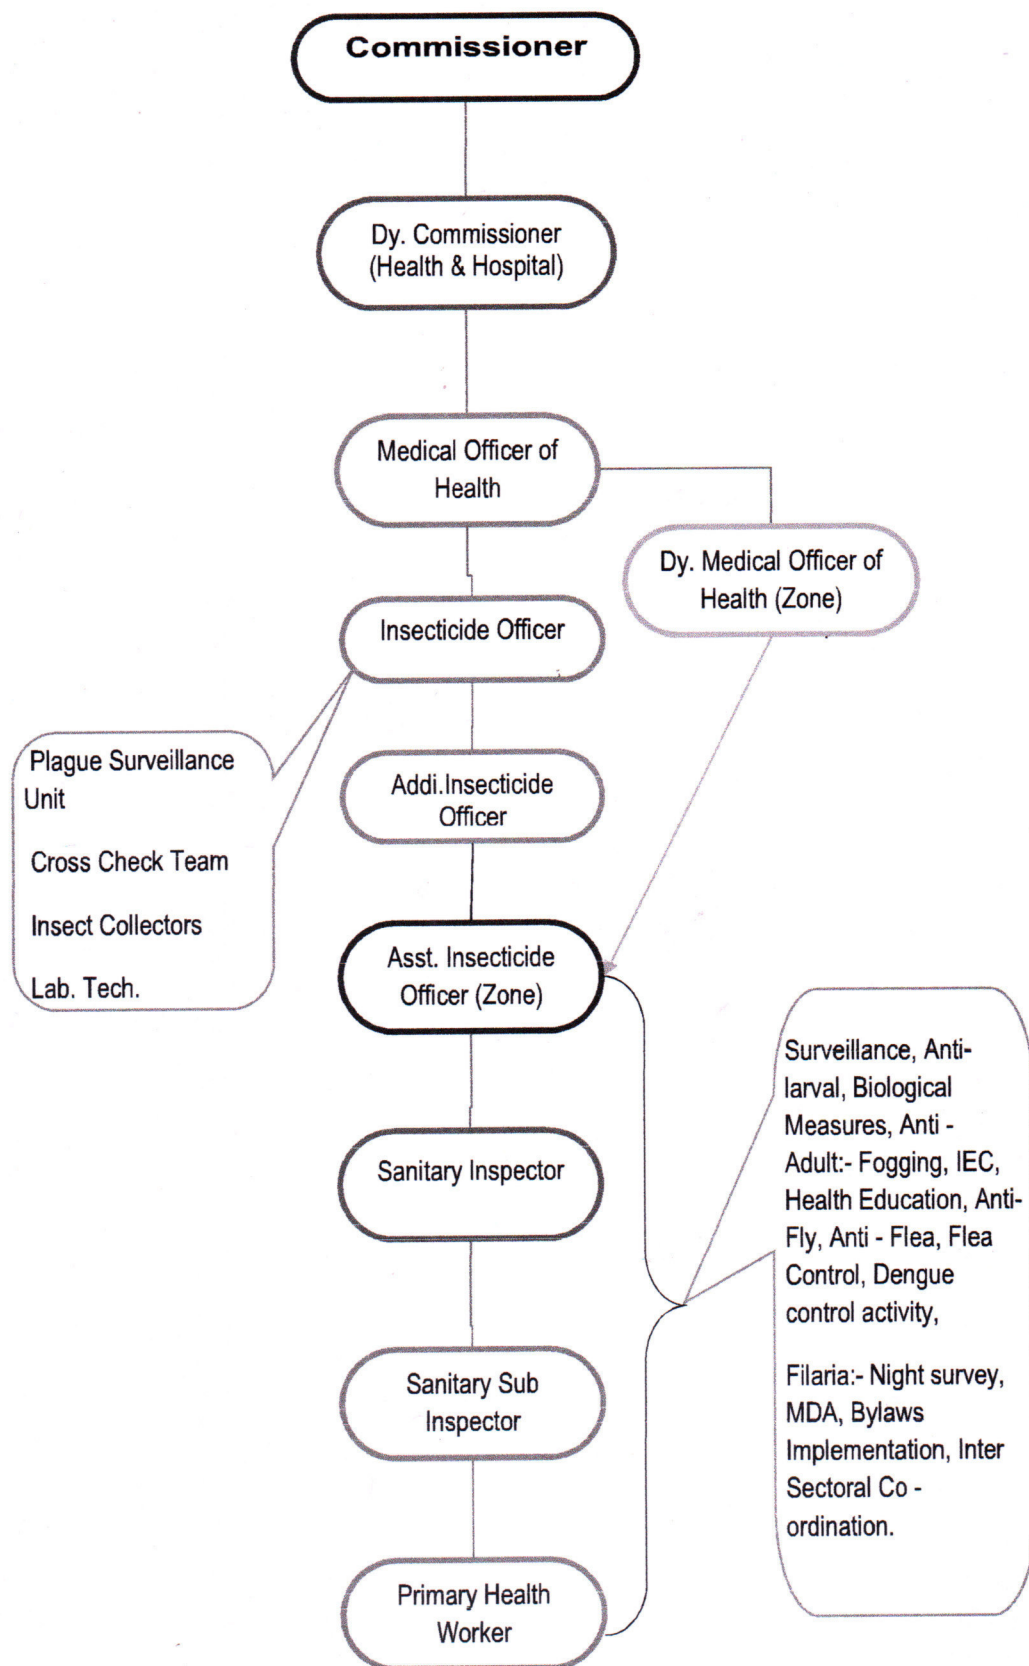

### Rodent and flea control activities

- Trapping will have to be done in areas where there are more rodents. (Action : AIO)
- On the next day of trapping dustings of Malathion 5 % will have to be done in rat borrows. (Action : AIO)
- Intensive activities will have to be done in the areas having high fly index to reduce the index. (Action : AIO)
- Samples of Viscera & Cera of the rodents will have to be sent to NICD, Delhi for testing every month and this information should be sent to Addl. Controller (AP.) Gandhinagar (Action : IO)

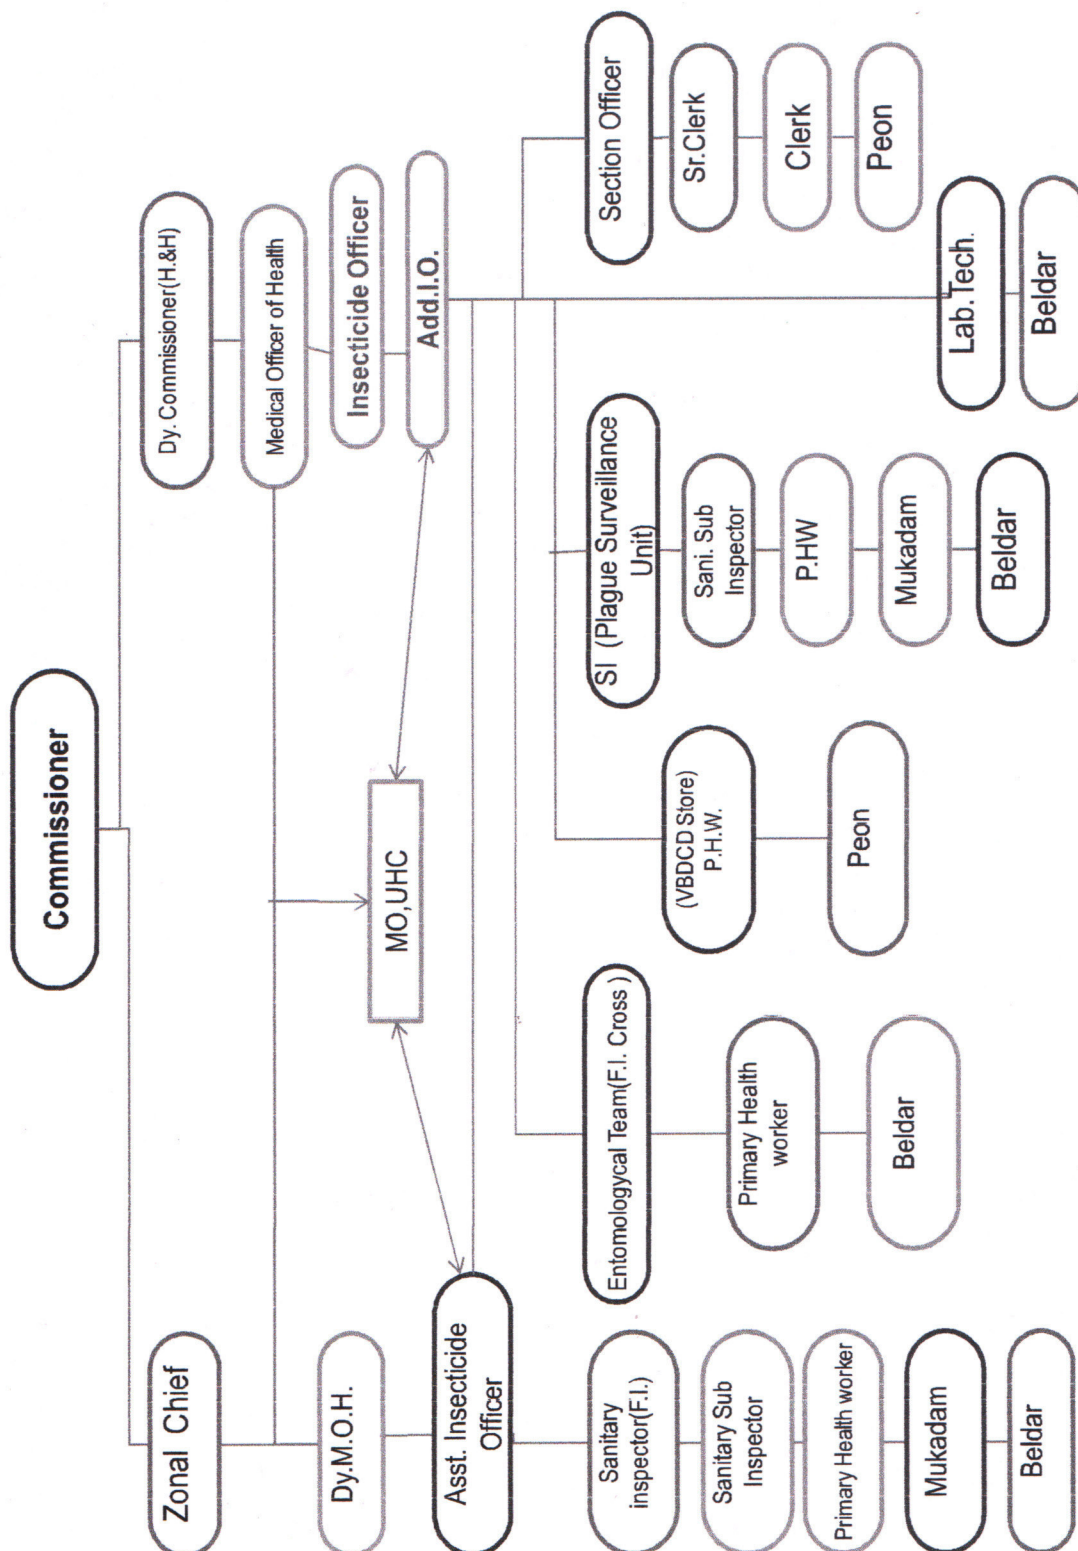

### Entomological works :-

- Entomological team should be instructed to work on information like Mosquitoes species identification, Malaria Vector Density, Filaria Vector Density, Aedes Vector Density, General Mosquito Density gathered from different zones.
- All zonal heads should conduct weekly review regarding the actions taken and discuss the matters. Health officer should review all the work done and coordinated report should be submitted to insecticide officer.

# HEALTH SERVICES SYSTEM: Organogram

## CHAPTER - 8

### Extreme Heat / Heatwave / sun stroke

Excessive heat is harmful to human health. An increase in day temperature is being observed at the beginning of this year. Cases of sun stroke due to excess heat are reported. Which if not treated on time, can prove to be fatal.

In cases of sun stroke, the body temperature is usually high. As the temperature of the environment is high, sweating is very high and due to this the body temperature cannot decrease, which has adverse effects on the health of a person.

- Muscle weakness or cramps
- extreme thirst
- dizziness or fainting;
- nausea or vomiting;
- rapid breathing
- fast heartbeat

#### For general population

- Avoid strenuous activities when outside in the afternoon
- Wear thin loose, cotton garments preferably light colour.
- Children, Pregnant women and elderly are most at risk of heatstroke.
- Drink Lots of Water. Keep electrolytes (water with salt and sugar) at home.
- Use fan, spray bottles, damp cloths, ice towels to cool down body.
- Avoid Starvation as much as possible during hot season.
- If someone has a heatstroke, cool him/her with an ice pack and cold water, then rush him/her to hospital.
- Ensuring that people are told to be cautious as per heat wave alerts sent from the state level.
- In addition to this, Ensuring that the quantity of necessary medicines like iv fluids, ice packs, ORS and other life saving medicines and other necessary equipment are available in sufficient quantity and ensuring that adequate drinking water system and cooling is maintained in every health facility.
- To encourage installation of solar panels, cooling devices and roofs, window shades, rain water harvesting system etc. where possible in urban health center.
- Follow public Health Advisory : Extreme Heat/Heat wave(Do's and Don't)

#### Stay hydrated:

- Drink sufficient water whenever possible, even if you are not thirsty. Thirst is not a good indicator of dehydration.
- Carry drinking water when travelling
- Use Oral Rehydration Solution (ORS), and consume homemade drinks like lemon water, buttermilk/lassi, fruit

## DISASTER MANAGEMENT AND PREPAREDNESS PLAN

juices with some added salt.

- Eat seasonal fruits and vegetables with high water content like watermelon, muskmelon, orange, grapes, pineapple, cucumber, lettuce or other locally available fruits and vegetables.

### **Stay covered:**

- Wear thin, loose, cotton garments preferably light coloured
- Cover your head: use umbrella, hat, cap, towel and other traditional head gears during exposure to direct sunlight
- Wear shoes or chappals while going out in sun

### **Stay alert:**

- Listen to Radio; watch TV; read Newspaper for local weather news. Get the latest update of weather on India Meteorological Department (IMD) website at <https://mausam.imd.gov.in>.
- Stay indoors/in shade as much as possible: • In well ventilated and cool places • Block direct sunlight and heat waves: Keep windows and curtains closed during the day, especially on the sunny side of your house. Open them up at night to let cooler air in. • If going outdoor, limit your outdoor activity to cooler times of the day i.e., morning and evening • Reschedule or plan outdoor activities during cooler parts of the day.
- For vulnerable population although anyone at any time can suffer from the heat stress & heat-related illness, some people are at greater risk than others and should be given additional attention. These include: • Infants and young children • People working outdoors • Pregnant women • People who have a mental illness • Physically ill, especially with heart disease or high blood pressure • Travellers from colder climate to a hot climate should allow one week's time for their bodies to acclimatized to heat, avoid overexertion, and should drink plenty of water. Acclimatization is achieved by gradual increase (over 10-15days) in exposure/physical activity in hot environment.
- Other precautions
- Elderly or sick people living alone should be supervised and their health monitored on a daily basis.
- Keep your home cool, use curtains, shutters or sunshade and open windows at night.
- Try to remain on lower floors during the day.
- Use fan, spray bottles, damp cloths, ice towels to cool down body.
- Immersing feet in 20°C water above ankle provides rapid cooling by reducing dehydration and thermal discomfort.
- Avoid getting out in the sun, especially between 12:00 noon and 03:00 pm
- Avoid strenuous activities when outside in the afternoon
- Do not go out barefoot
- Avoid cooking during peak summer hours. Open doors and windows to ventilate cooking area adequately
- Avoid alcohol, tea, coffee and carbonated soft drinks or drinks with large amount of sugar- as these actually, lead to loss of more body fluid or may cause stomach cramps
- Do not eat stale food.
- Do not leave children or pets in parked vehicle. Temperature inside a vehicle could get dangerous.
- Caution workers to avoid direct sunlight • Provide shaded work area for workers. Temporary shelter can be created at work site.
- Schedule strenuous and outdoor jobs to cooler times of the day i.e., morning and evening hours.

## DISASTER MANAGEMENT AND PREPAREDNESS PLAN

- Increase the frequency and length of rest breaks for outdoor activities- at least every 5 minutes after 1 hour of Labour work
- Precautions During Mass gathering/Sport event :-
- Outdoor/indoor crowded situations increase risk of acute heat-related illnesses (HRI) even in absence of active heatwave alerts in the area.
- Physical exertion, direct sun exposure, overcrowding, and difficult access to water, food and shade may worsen health in vulnerable groups.
- Attendees should stay hydrated, cool, be aware of HRI signs, symptoms and seek medical care.

### **For Employers and worker :-**

Provide cool drinking water at work place and remind them to drink a cup of water every 20minutes or more frequently to stay hydrated

- Caution workers to avoid direct sunlight
- Provide shaded work area for workers. Temporary shelter can be created at work site.
- Schedule strenuous and outdoor jobs to cooler times of the day i.e., morning and evening hours
- Increase the frequency and length of rest breaks for outdoor activities- at least every 5 minutes after 1 hour of labour work
- Listen to Radio; watch TV; read Newspaper for local weather news and act accordingly. Get the latest update of weather on India Meteorological Department (IMD) website at <https://mausam.imd.gov.in/>
- Assign additional workers or slow down the pace of work
- Make sure everyone is properly acclimatized: it takes weeks to acclimatize to a hotter climate. Do not work for more than three hours in one day for the first five days of work. Gradually increase the amount and time of work.
- Train workers to recognize factors which may increase the risk of developing a heat related illness and the signs and symptoms of heat stress and start a “buddy system” since people are not likely to notice their own symptoms
- Trained First Aid providers should be available and an emergency response plan should be in place in the event of a heat-related illness.
- Pregnant workers and workers with a medical condition or those taking certain medications should discuss with their physicians about working in the heat.
- If working outdoors wear light-coloured clothing preferably long sleeve shirt and pants, and cover the head to prevent exposure to direct sunlight.
- Organize awareness campaigns for employees
- Install temperature and forecast display at the workplace.
- Distribute informational pamphlets and organize training for employers and workers regarding health impacts of extreme heat and recommendations to protect themselves during high temperature

## CHAPTER - 9

### First Aid

#### First Aid

The steps taken to keep the patient out of dangerous situation, or his getting relief in his injury or his injury does not increase or his life is not Put in danger, before he gets treatment from a doctor, or the patient is removed to a doctor or a hospital is called first aid.

#### The objectives of first aid

- To check up the condition of injury.
- To decide as to what type of treatment is necessary and to give such first aid.
- To arrange for removing him to appropriate place ( i.e. a doctor or a hospital)

In the running of the body different systems play important part. These systems include main systems like nervous system, digestive system, respiratory system, excretory system and reproductive system.

#### Wounds

**When the skin is cut & blood comes out because of some injury it is called a wound.**

1. While dressing, firstly the wound should be cleaned with clean water or bacteria killing liquid.
2. If the wound has some waste or foreign material, it should be removed, if possible.
3. The wound should be treated by bacteria killing ointment, liquid or powder and should be covered by a tape.
4. Bandage is necessary for a deep wound.

#### Bleeding

Bleeding is of two types.

- Outside bleeding.
- Inside bleeding.

#### Symptoms

- Vertigo, fall down.
- The skin of the body becomes dry / cold.
- The palpitation becomes very fast but can't be experienced.
- Difficulty in respiration.
- Excessive perspiration.
- Excess thirst to the patient.

#### What would you do?

- External bleeding put direct pressure on the wound.
- If there is bleeding, pressure on the upper part of the heart will reduce the intensity of blood coming out (bleeding will decrease)
- Do the dressing with bandage to stop the bleeding.
- To stop the bleeding, indirect pressure that in the figure should also be done.

- Bandage should not be very fit / tight.

#### Internal bleeding

Internal bleeding is more serious & risky than the external bleeding.

#### Bone Injuries

If there is a crack in the bone or it breaks into two parts it is called fracture.

## Symptoms of fracture

1. There is severe pain on touching & pressing the place of fracture or place around it.
2. Swelling
3. Difficulty in ordinary movement of fractured part.
4. The part becomes deformed.
5. Many times shape of affected part or hand or leg is changed.
6. The part or hand-leg hangs.
7. Local impression at the place of fracture.
8. There is noise when the broken bone rubs with other part.

## What care should be taken?

- Check up other injuries.
- Give the treatment first to the part which is bleeding.
- First aid should be given for fracture on the every place.

## First aid of the Fracture :

### What should be done?

- The part of fractured portion should be made steady & supported. This will stop unnecessary movement so that further damage can be stopped.
- Bleeding & other injuries should also be treated.
- For stopping the movement bandage or splints can be used.

### What should not be done?

- Do not allow unnecessary movement.
- Do not try to bring the two ends of the broken bone near or to repair the fracture.

## Fracture of some of the bones and their first aid

### Fracture of the rib

Broad bandage around the chest so that there is no more movement of the ribs.

### Fracture of the hand

To stop the movement of the shoulder the hand should be tied to the chest and should be steadied. To stop the movement of elbow, it should be put in bag.

### Fracture between hand and wrist

Wrist must be steadied through splints & bandage and the hand with bag.

### Fracture of the hand above the wrist and of the fingers

The Wrist and fingers should be made still by giving support through splints and bandage.

### The Fracture of the hip

The movement of the patient should be stopped and his legs should be tied together to make them still.

### Fracture of the thigh or femur?

The movement of the patient should be stopped and the legs should be made still with long splints.

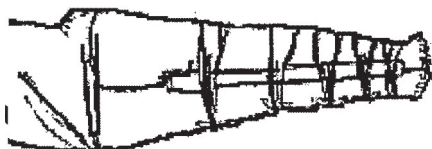

### Fracture of the leg

The leg should be bound with splints or with other leg and be made still. The soles of should be made still by bandage bound in the shape of 8 in English.

### Spraining:

#### What would you do?

Arrange the limits in restful position. Support the injured part with bag or splint. Put cold packs.

### Unconsciousness - swoon - shock

Whenever there is a hindrance in the ordinary activities of the mind and nerves of the patient many a time he loses consciousness. It is called unconsciousness or swoon.

#### Treatment of the unconscious patient

- The patient should be arranged in comfortable position and his head is on one side.
- Look whether the respiration of the patient is not disturbed.
- If necessary artificial respiration be given.
- Bleeding, if any, should be stopped.
- If you feel that there is a fracture steady that part with splints.
- Don't give anything to the patient through his mouth.

### Epilepsy, hysteria or fit

- If the whole body & hands get stretched or have a fit. The person becomes unconscious eyeballs moves towards upward direction tongue gets crushed, flow of urine in clothes etc are the symptoms of fit.
- The patient becomes still within a period of one to two minutes of attack.

#### What would you do?

- Arrange to see that the patient sleeps on a side.
- Put soft thing like handkerchief so that his tongue is not cut or crushed.
- Be careful to see that the patient does not have an injury.

#### What should you not do?

- Don't press with force.
- Don't try to open the jaws forcefully.
- Don't put strong things like spoon in his mouth.
- Do not smell onion or chhapal.

#### Positioning and its treatment

- Observe the physical condition of the patient.
- Observe whether the pulses & respiration are proper or not.
- See whether patient is conscious or unconscious.
- Try to know what has been taken by mouth by the patient.
- Check up whether the patient's mouth or tongue is burnt or not.
- Make him vomit if the patient is conscious and his mouth or lips are not burnt.
- If these are burnt do not try to make him vomit.
- If unconscious then also don't make him vomit. Make him sleep on chest keep his head on one side.
- Try to shift him immediately to dispensary.

### Snake Bite

- Console the patient.
- Bind a fit bandage or elastic bandage on the upper part of the string so that poison does not spread in the body. At the interval of every 10 minutes it should

## DISASTER MANAGEMENT AND PREPAREDNESS PLAN

be loosened for half minute or a minute.

- Bleeding should be allowed to flow out by doing a few cuts around the wound with a sterilized or a new blade. So that the poison can come out. Do not try to suck out the poison as it can be dangerous.

### Breathing Hindered

The proportion of respiration is 16 to 18 every minutes

#### The sign of hindrance to breathing are

- Vision of the eyes is obstructed and eyes become weak.
- The rate of respiration decreases & becomes difficult.
- Pulse is faster
- Some unconsciousness appears (has dizzy feelings)
- Cheeks and lips become blue.

### Drowning

#### What would you do?

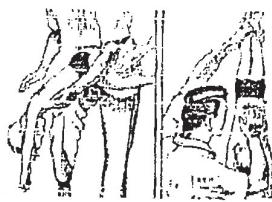

- Clean the mouth and neck, he should be made to sleep on chest keeping his face on one side. Put folded bed sheet or towel under the stomach and give pressure on the back. So that as much water as possible comes out from the stomach and chest.
- If need, artificial respiration should be done.

### Choking of the Throat

- Many a time some thing enters the children's nose while they are playing. As a result, the passage for breathing is hindered. It may become pale.

#### What would you do?

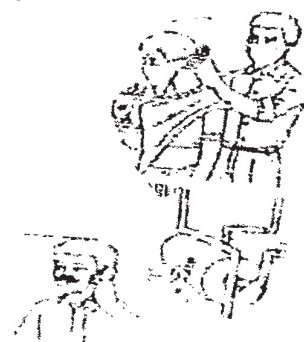

- Hold the child upside down with legs, and slap on the back (Keeping its stomach and chest on legs)
- In case of aged person standing behind him giving jerks on the upper side of stomach, may take out the thing from inside, due to sudden pressure on lungs.

### Suffocation due to poisonous gas?

#### What would you do if it is poisonous gas?

- If the gas is light (in weight) go to the place in bent position. If the gas is heavier than the air remain in an erect position. Remove the patient immediately to the open air and give artificial respiration.

### Artificial respiration

#### Three methods:

- 1 Mouth to Mouth  
(picture)

- 2 Holger naels system.  
(picture)

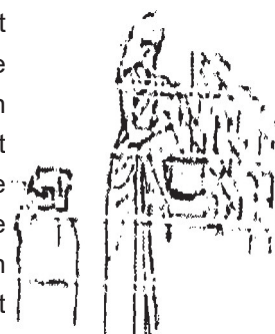

- 3 Stiffer method.

### Injuries because of the burning or burns

When the clothes of persons are burning take a thing like blanket wrap at around the person & make him lie on the ground on back so that burning is put out. If person's clothes are burning, he should lie the ground and should roll on the ground and try to put out the fire by a cloth or

water available nearby. He

should not rush out in the open air while his clothes are on fire.

### First Aid for person on fire or burnt

- If it is not necessary, do not touch the burnt part.
- Burnt clothes or clothes stuck to the body should not be taken out.
- Pour cold water on the burnt part.
- Give treatment for the shock.
- If the burns are due to chemical products, then adequate use of water should be sprayed on burned portion. Burnt portion should not be covered by soil.

### Electric shock

#### What would you do?

- Cut off the electric power supply
- Switch off the main switch.
- To separate the person from electric current, use wooden or other materials through which the current does not pass.
- Treat for the shock.
- Cover the burnt part and give first aid.

### Other injuries

#### Injury of the eye what would you do?

- If some dust or foreign material has fallen in the eye, the patient should be kept in a lying position and take eye lids up and down and clean the eyes with clean water.
- If something like chemical materials falls in it, patient's eyes should be cleaned by water repeatedly.

### Management of Acute diarrhoeal Diseases:

- Oral Dehydration Solution (ORS) can be very useful for the child. This can be prepared by mixing two spoons of sugar and a little salt in a glass of water. The liquid given to the person should be equal to the loss of liquid. (Dehydration) from the body. If someone Unconscious Appears due Dehydration Contact your near Hospital or UHC.

### **50 BEDS HOSPITAL**

With the Noble intention of providing quality health care facilities to the citizens of Surat, Surat Municipal Corporation inaugurated a 50-bed hospital.

Surat Municipal Corporation started 50 bed hospitals at Pal, Bamroli, Bhathena and Katargam Community Health Center. At 50 beds hospital services of OPD and IPD treatment. Specialist Treatment like medicine, surgery, gynaecologist, paediatrics, physician, physiotherapist, dentist and Emergency services are available.

## CHAPTER - 10

### Standing Instructions for actions to be taken During Monsoon (From First rain or 15th of June)

The Divisional Heads, Departmental Heads and all Zonal Officers of SMC should take below mentioned actions in case of emergency such as Heavy Rains Flood, Cyclone and other Natural Calamities.

#### Work of Control Room :

1. The Central Wireless Control Room at The ICCC (Integrated Command and Control Center) be set for the working as the control room to perform the activities to cope with flood, cyclone, heavy rain etc. City Engineer will be incharged.
2. Every zone should start a Control Room to perform the activities to cope with the emergency such as flood, cyclone and natural calamities. This information will have to send to the Central Wireless Control Room The ICCC (Integrated Command and Control Center).
3. No leave of any employee should be sanctioned except in case of special case or illness during emergencies.
4. At the time of emergency, all Deputy Engineers, Assistant Engineer, Junior Engineers, Dy. Medical Officer of Health, Chief Sanitary Inspectors, Section Officers etc & other responsible officers / employees will have to remain present at concerned zone offices. The officers / employees listed here with will have to be present at the H.Q. and staff of the primary education committee at the designated location in the statement. (list or annexure )
5. Central departments like Traffic, Hydraulic, Drainage and Road Department etc will have to speedily provide whatever help and guidance demanded by the zone offices for their routine work.
6. A latest list of the names, addresses along with phone no., fax & mobile no. of offices associated with emergency like flood, cyclone and heavy rain will have to be kept ready at the central control room and every zone control room.
7. To inform the public immediately about the safety measures and rescue and relief operations in times of emergency, the arrangement for the 'public address systems ' vehicle will have to be done on zone basis.
8. The effects of flood in the creeks and in the river are in different proportions in different zones. Keeping this in mind, it is necessary to make staff, equipments, vehicles, machinery etc available from other zone areas for the affected area completing the activities during and after the floods within time limit prescribed, as a part of preplanning to be done. ( the following should be done )

I. During the flood in the creeks two teams from Central Zone will have to be allotted to Udhna Zone for the work (to be done) while during river flood two teams from Udhna Zone will have to be allotted to Central Zone.

II. At the time of creek flood two teams will have to be allotted from Katargam zone to Limbayat Zone for the work to be done. While in case of river flood, two teams from Limbayat Zone will have to be allotted to the Katargam Zone.

III. During creek flood, one team out of the two from Rander zone should be allotted to Athwa Zone area and the other team to Varachha Zone area while during river flood (vice versa) one team each from Athwa & Varachha

## DISASTER MANAGEMENT AND PREPAREDNESS PLAN

zones should be allotted to Rander zone.

IV. In every team for rescue, relief, cleanliness, rehabilitation etc work the officer / employees as under should be included.

- (a) One Deputy Engineer.
- (b) Two Jr./Assist. Engineer.
- (c) Four Technical Assist.
- (d) Twenty Beldar with equipments.
- (e) One Chief S. I.
- (f) Two S.I. / S.S.I.
- (g) Three Mukadams (Foremen)
- (h) Twenty five cleaners with equipments.

**V. For every team necessary vehicles and machinery will have to be made available.**

- 9. City Engineer will have to work in coordination with District Collector and State Government officials.
- 10. Copies of the reports of daily work done by zone offices / fire brigade / health dept. will have to be submitted to central control room.
- 11. Public Relations Officer will have to do all the activities related to co-ordinated press briefing, transmission, photography etc under the direct control of Dy. Commissioner.
- 12. The report of the daily activities done by concerned zone / fire brigade departments & health department will have to be sent to the Public Relations Officer. On the basis of these reports, PRO has to prepare the press note under the instruction of Dy. Commissioner.

### **Rescue Wrok :**

- 13. The Fire & Emergency department will have to arrange in advance for installing wireless set and boats near the slums on the banks of the creeks, river and other slums likely to submerge under (flood) water.
- 14. The concerned zone and Fire and Emergency Services Dept. will have to carry out rescue and relief work at the time of flood, cyclone, or heavy rains. The coordination of such work will have to be made by divisional head of the Fire & Emergency Services department.
- 15. At the time of floods / cyclone, arrangement for boats and siren will have to be made by Chief Fire Officer in advance.

### **Relief work :**

- 16. Every zonal officer will have to arrange for providing schools for relief centres. Chief Security Officer will have to arrange for security staff for emergency.
- 17. The Administrative Officer -MSB will have to provide the staff of primary education committee for opening the schools to work as relief centers. The zone will have to arrange for cleaning the schools after the relief work is over. Arrangement for providing security staff during this period will have to be done by Chief Security Officer.
- 18. During heavy rains, flood & cyclone relief and rescue operations, preparation and distribution of food packages along with cleaning of relief centres and health oriented activities in affected areas will have to be carried out by concerned Zonal Officer / Dy. Health Officer and Assessment and Recovery Officer.

### **Rehabilitation work :**

19. All Zone Officers and Dy. Health Officers should carry out activities in their concerned areas such as scraping, filling of the pits / trenches, patch work, lifting of solid waste, repairing of leakage of water & drainage lines, spraying of insecticides, distribution of medicines / drugs, fogging, oil spraying etc. Besides these, removal of obstructing encroachment / structures for the disposal of storm water will have to be done. Other activities such as removal of obstructing building materials, destruction of unhygienic food material etc. will also to be done. Preventive measure will have to be taken so that epidemic does not spread.
20. All Zonal Officers will have to see that the complaints forwarded by central wireless control room from their concerned areas and complaints made from the leading citizens / newspapers or enlightened organizations are redressed at the earliest. Controlled vigilance will have to be kept to see that epidemic does not spread.
21. Zonal officers are authorized to hire at the approved rate of rent, additional trucks, tempo, tractors, bulldozers, loaders & such other vehicles for ten days needed at the time of emergency.
22. Store Superintendent will have to keep enough stock of petromex, tagara, spades / pawada, ropes, galvanized sheets etc at affected places, for use during emergency.
23. Every zonal officer will have to keep sufficient stock of petromex, tagaras, spades / pawada, ropes, gl.sheets, vali sand, rubble, chhara, sand bags, road material etc for the affected areas.
24. Prior arrangement for the availability of premix material of bitumen from the patch department of the zone will have to be made.
25. Every zonal officer will have to look after the activities of road repair work.
26. Garden Superintendent will have to arrange for lifting the trees fallen during heavy rains / cyclone.
27. Provision should also be made for air-tight overhead/under ground tanks in building under construction.
28. Lifting & Disposal of big animal carcasses should be handled by solid waste management at main office where of for small animal carcasses should be done by respective zones .
29. Filarial/Malaria Branch of the zones should take immediate extensive action to control Filarial/Malaria in affected areas and Insecticide office should supervise on all such activity.

The above instructions should be strictly followed. Orders from necessary officers should be made at zone level and to concerned persons will have to be made known about these in advance.

# DISASTER MANAGEMENT AND PREPAREDNESS PLAN

## list of officers / employees to remain present at time of / during emergency

Sr. No.	Name	Designation	Department	
1.	Shri Maulik M. Rao	Ex. Eng (Civil)	Hydraulic	Water Resource and Recreation cell (Addi. Charge)
2.	Shri Mineshkumar C. Patel	Ex. Eng (Civil)	Hydraulic	
3.	Shri Kamleshkumar T. Patel	I/C Ex. Eng (H.W.W)	Hydraulic	
4.	Shri Harishkumar V. Vora	Deputy Eng (Civil)	Hydraulic	
5.	Shri Nitinkumar V. Chaudhari	Deputy Eng (Civil)	Hydraulic	
6.	Shri Sanjaykumar T. Panchal	Deputy Eng (Civil)	Hydraulic	
7.	Shri Paresh A. Jariwala	Deputy Eng (Ele)	Hydraulic	
8.	Shri Jaydeep N. Parikh	Deputy Town Planner	Town Planning	Also working as Town Planner (A)
9.	Shri Ashwin K. Tailor	Deputy Town Planner	Town Planning	
10.	Shri Rachita S. Desai	Deputy Town Planner	Town Planning	
11.	Shri Tasnim M. Barbhuiwala	Deputy Town Planner	Town Planning	
12.	Shri Priteshkumar R. Patel	Deputy Town Planner	Town Planning	
13.	Shri Niyati K. Desai	Deputy Town Planner	Town Planning	Working with GIS Cell
14.	Shri Bhavini A. Desai	Deputy Town Planner	Town Planning	
15.	Shri Nitya Dave	Deputy Town Planner	Town Planning	Working with Dept. of Aff. housing
16.	Shri Bhavesh M. Takodiya	Deputy Town Planner	Town Planning	Working with SWZ and Bio Diversity Park Project
17.	Shri Prashant P. Patel	Deputy Town Planner	Town Planning	
18.	Shri Ketankumar K. Patel	Asst. Town Planner	Town Planning	
19.	Shri Vishal M. Champaneria	Asst. Town Planner	Town Planning	
20.	Shri Nirav R. Gheewala	Asst. Town Planner	Town Planning	
21.	Shri Ankitkumar V. Mehta	Asst. Town Planner	Town Planning	
22.	Shri Yamin A. Patel	Asst. Town Planner	Town Planning	Working with GIS Cell
23.	Shri Viralkumar P. Patel	Asst. Town Planner	Town Planning	Working with Suda
24.	Shri Dhaval P. Babariya	Asst. Town Planner	Town Planning	
25.	Shri Sanjaykumar P. Patel	I/C TDO	TDO	
26.	Shri Chandrajeetsinh M. Rathod	Garden Superintendent	Garden Project Cell	
27.	Shri Rakesh N. Modi	Ex. Eng	Drainage	Working with Env. and Improvement Cell

## DISASTER MANAGEMENT AND PREPAREDNESS PLAN

28.	Shri Kirankumar D. Modi	Deputy Eng (Civil)	Drainage	
29.	Shri Dilipkumar A. Patel	Deputy Eng (Civil)	Drainage	
30.	Shri Dhaval C. Popawala	Deputy Eng (Civil)	Drainage	
31.	Shri Hashmukhbhai I. Prajapati	Deputy Eng (Civil)	Drainage	
32.	Shri Sunilkumar R. Rajbhoi	Deputy Eng (Civil)	Drainage	
33.	Shri Kamleshkumar T. Patel	Deputy Eng (Ele.)	Drainage	Also working in Hydraulic Dept as I/c. Ex. Eng.
34.	Shri Prakashkumar K. Pandya	Deputy Eng (Ele.)	Drainage	Also working as I/c. Ex. Eng (Workshop / Mech) & EEC
35.	Shri Yogeshkumar N. Papoli	Deputy Eng (Ele.)	Drainage	
36.	Shri Vishal R. Dalal	Deputy Eng (Mech.)	Drainage	Also Working with Mun. Workshop
37.	Shri Jayang R. Jivanramjiwala	Ex. Eng (Bridge Cell)	Bridge Cell	Also Working with Central Office (RAC)
38.	Shri Sanjay S. Modi	Deputy Eng. (Civil)	Bridge Cell	
39.	Shri Satishbhai C. Vasava	Ex. Eng	P.I.Cell	Also working in Swimming pool, Garden, Heritage Cell, Central Designing Cell
40.	Shri Hetulkumar M. Panchal	Deputy Eng. (Civil)	P.I.Cell	
41.	Shri Anand R. Partiwala	Deputy Eng. (Civil)	P.I.Cell	
42.	Shri Vipul S. Pastagiya	Deputy Eng. (Ele)	P.I.Cell	Heritage and Central Designing Cell
43.	Shri Kamleshbhai L. Vasava	Ex. Eng	Traffic - BRTS Cell	
44.	Shri Anilkumar D. Bhojawala	Deputy Eng. (Civil)	Traffic - BRTS Cell	
45.	Shri Viral N. Mehta	Deputy Eng. (Ele)	Traffic-BRTS	
46.	Shri Tejas T. Patel	Ex. Eng	CE SP CELL	
47.	Shri Krishnakant H.Chaudhary	Deputy Eng. (Civil)	CE SP CELL	
48.	Shri Rakesh S. Barfiwala	Deputy Eng. (Civil)	CE SP CELL	Water Resource and Recreation cell (Addi. charge)
49.	Shri Manishkumar G. Bhagat	Deputy Eng. (Civil)	CE SP CELL	
50.	Shri Sandipkumar K. Dhimmar	Deputy Eng (Civil)	CE SP CELL	
51.	Shri. Rakeshkumar D. Ganjawala	Ex. Eng	Dept. of Aff Housing	
52.	Shri Shubhashbhai C. Gohil (Ret. on Dt. 31-12-2025)	Deputy Eng (Civil)	Dept. of Aff Housing	

# DISASTER MANAGEMENT AND PREPAREDNESS PLAN

53.	Shri. Sanjaykumar P. Patel	Deputy Eng (Civil)	Dept. of Aff Housing	I/C TDO
54.	Shri Mehulkumar D. Patel	Deputy Eng. (Ele)	Dept. of Aff Housing	Also Working with Drainage and Env. Improvement cell
55.	Shri Priyesh I. Magajwala	Deputy Eng. (Ele)	Dept. of Aff Housing	
56.	Shri Rupesh R. Shah	Ex. Eng	RDD	
57.	Shri Niravkumar A. Puniwala (Ret. on Dt. 30-11-2025)	Deputy Eng. (Civil)	RDD	
58.	Shri Rohit M. Patel	Ex. Engg	Workshop	
59.	Shri Rashikbhai M. Patel (Ret. on Dt. 31-08-2025)	Asst. Engineer (Workshop)	Workshop	Also working as Deputy Engineer (Workshop)
60.	Shri Mansangbhai N. Chaudhari	Ex. Eng (Ele./Mech.)	Ligh & EEC	Working with BRTS Project and General Manager (Sitalink)
61.	Shri Manishkumar M. Patel	Deputy Eng (Ele.)	Light & EEC	
62.	Shri Mayankkumar A. Rawal	Deputy Eng (Civil)	Dream City Project	
63.	Shri Nileshkumar M. Tailor	Deputy Eng (Civil)	Env. and Improvement Cell	
64.	Shri Chirag R. Vankawala	Deputy Eng (Civil)	Advertisement Cell	
65.	Shri Bharatkumar L. Savaliya	Personnel Officer	Central Establishment (Health)	I/C PO (Central Establishment)
66.	Shri Manishkumar S. Patel	I/C D.I.O.	Inquiry	
67.	Shri Dhaval R. Modi	Personnel Officer	Central Est. (Recruitment)	
68.	Shri Mitul A. Pandya	Law Officer	Law Dept	Asst. Nodal Officer (RTI Cell)
69.	Shri Aiman A. Shaikh	Asst. Law Officer	Law Dept	
70.	Shri Rajeshkumar A. Patel	I/C Zoo Superintendent	Sarthana Nature Park	
71.	Shri Rakeshbhai N. Modi	I/C Spcl Officer	Election and Census	
72.	Shri Divyeshkumar S. Gameti	I/C Chief Curator	Science Center	
73.	Shri Rajendrabhai N. Patel	Chief Curator (Aquarium)	Jagdishchandra Bose Aquarium	
74.	Shri Pruthavi A. Rangnekar	Curator (Fort)	Fort	
75.	Shri Meenaben P. Bhitara	Personnel Officer	Affordable Housing Cell	Also working as PO (NZ)
76.	Shri Arjunsinh B. Solanki	I/C Professional Tax Officer	Professional Tax	
77.	Shri Dharmeshbhai M. Patel	Administrative Officer	Suman Cell	

## DISASTER MANAGEMENT AND PREPAREDNESS PLAN

78.	Shri Pratimaben H. Rathod	Public Relation Officer	PRO	
79.	Shri Hemang U. Jani	Manager	Indoor Stadium	I/c. Gandhi Smruti Bhavan / Rang upvan
80.	Shri Dhaval B. Gandhi	Manager	Sanjeevkumar Auditorium	I/C Performing Art Center, Culture
81.	Shri Vinodbhai M. Chaudhari	Manager	Sardar Patel Smruti Bhavan	I/c. Swami Vivekanand Audi. and Varacha Sports Complex
82.	Shri Shaileshkumar K. Gajera	Personnel Officer	Smimer Hospital	
83.	Shri Mehulkumar S. Patel	Ex. Asst and I/O Administrative Officer	Central Office	Working in School Board
84.	Shri Pravinkumar R. Prasad	Ex. Asst	Central Office	Working in Civic Centre (CZ) & I/C AMC (SZ-B) and also working as A.O. (Sitolink)
85.	Shri Devangkumar D. Patel	Ex. Asst	ISD	Also Working as General Manager (Smart City)
86.	Shri Burhani A. Bhindarwala	Ex. Asst	ISD	Also Working in Central office of RAC Dept
87.	Shri Hemanginibahen K. Chauhan	Asst. Eng	Central Office	Working in WZ
88.	Shri Vikrambhai C. Chaudhari	Asst. Eng	Central Office	Working in SZ-B
89.	Shri Jagdish A. Salunke	Chief Food Safety Officer	Health (Food)	
90.	Shri Saradkumar I. Kaklotar	I/C Env. Eng	Solid Waste Management	
91.	Shri Rajeshkumar M. Patel	Chief Sanitary Inspector	Solid Waste Managment	
92.	Shri Sanjaykumar J. Shah	Chief Sanitary Inspector	Solid Waste Managment	On loan Market Dept
93.	Moh. Faiyaaz Moh. Azim Gadiwala	Office Superintendent	Central Office	Also Working with RCPS
94.	Shri Ranchodbhai C. Patel	Project Officer	UCD	
95.	Shri Rajesh P. Maisuriya	Section Officer	Record / Mun. Press	
96.	Shri Rimple A. Mistry	I/C Section Officer	RTI Cell	
97.	Shri Yogeshkumar M. Kattawala	I/C Shops and Establishment Inspector	Shops and Establishment	
98.	Shri Bakulkumar G. Sarang	Chief Swim. Instructor	Swimming Pool	
99.	Shri Jitendrabhai K. Patel	I/C Section Officer	Vehicle Tax	
100.	Shri Sandip M. Topare	Second Grade Clerk	Mid Day Meal Scheme

15	Information about leakage										
	total leakage										
	how many attended										
	remaining (not attended)										
16	The compliant of contaminated (dirty) water										

Note: The details work done during 24 hours ending on 12=00 clock afternoon of the day should be reported (sent) at 4=00 clock in the evening every day.

## CHAPTER - 11

### **The Standing Instructions given for Preparedness about flood, cyclone to department / Zones**

#### **[At emergent time when there is a forecasting (about - flood / cyclone)]**

The Standing Instructions given by Commissioner for starting the activities regarding possibility of cyclone / rain.

#### **Rescue Operations :**

1. Garden Departments should keep the equipment, tractors ready along with the staff for cutting the trees.
2. Check up whether all the vehicles / equipments of fire brigade are kept in working condition or not.
3. Contact the NGOs; ask them to keep the volunteers ready.
4. The keys of relief centres / schools should be obtained. Be ready in advance for the transfer of the people of the affected areas keeping in mind heavy rains & tidal waves. Arrange for vehicles for publishing messages in all zones.
5. The Town Planner and all the Zonal Officer should inform the concerned agencies for removing all the hoardings put on the roads.
6. All the Zonal Officers should take precautionary measures by keeping necessary staff ready for continuous discharge (disposal) of water from the low lying areas likely to have accumulation of water due to nearby creeks having inflow of water due to tides.
7. When forecast of severe cyclone and heavy rain is made, all Zonal Officers should take necessary steps so that because of such calamities deaths / accidents do not take place.
8. All Zonal Officers should arrange for keeping generators in working condition at important places.
9. In every meeting held under their command / control they should go on reminding about the disaster management plan prepared regarding flood & cyclone.

#### **Relief Operations :**

10. All zones control room and central control room should be continued till the receipt of further instructions.
11. No officer / employee should leave the head quarters.
12. Contingency plan should be kept handy and relief operations should be carried out accordingly.
13. The staff, equipments etc should be kept ready for relief work in every zone.
14. Day Off's, Holiday (leave) of all Fire Brigade staff should be cancelled and they should be given alert message.
15. Whenever there is a possibility of cyclone to blow at a speed of 100 km per hour & this speed is likely to go up to 150 km per hour, serious preparations should be made. (for rescue & other activities )
16. Whenever there is a possibility of heavy rains preparations should be so made that rescue & relief operations can be started immediately.
17. Alert message should be given to the staff so that all of them can be present at short notice.

18. Whenever the cyclone forecast is continuing all Zonal Officers should continue their activities of precautionary measures in the concerned areas entrusted to them.
19. Arrangement should be made to maintain the message properly in the Log book at the central control room & zone control rooms during the cyclone / flood / natural calamity.
20. Sometimes difficulties in the areas in the city due to some matters in the areas adjoining the city. All the Zonal Officers should take these into account and should take necessary steps through the nearby zone regarding them.

### **Aimed at Health :**

21. For treatment during relief work, hospital, medicine etc and also the emergency staff of the hospital should be kept ready.
22. The medical van of the Surat Municipal Corporation should be kept ready. The concerned doctors should be kept in touch and should be told to remain present on (short notice) information.
23. For additional patients necessary faculties should be kept ready in the municipal hospitals & health centres.
24. Immediate after the water recedes the arrangement for cleaning the mud & dirt form the low lying slum areas due to accumulation of water during tides should be made by all Zonal Officers.

### **Enlightenment of People :**

25. In concerned zones, all Zonal Officers should inform concerned Municipal Councilors and office bearers of NGOs regarding the concerned emergency (which has occurred)
26. In order that the public comes to know regarding precautionary measures to be taken at the time of cyclone, the PRO should publish the matter through the newspapers and local TV channel.

### **Precautionary Measures :**

27. At the time of cyclone, The Garden department officers should keep in contact with contractors who are given the contract of cutting the trees & inform them to keep their men ready.
28. Deputy Eng. / Ex. Eng. (street light) and all Zonal Officers should take steps so that there is no loss / loss of public life due to the light poles.
29. Brackets of the high mast towers in the city should be taken down as precautionary measures.
30. The Garden Superintendent should take into account the forecast of cyclone and should arrange for a survey of old, likely to fall down and risky trees and take precautionary measures.

**CHAPTER - 12****Flood in the Creeks: Information & Management**

Mainly Varachha creeks, Koyali creeks, Mithi creeks, Kankra creek, Bhedvad creek, Chhaprabhatha creek etc pass through the Surat city. Their discharge to sea is through main creek and Mindhoela river. The water of Tena creek flows directly into the sea. In the upper flow there are taluka areas of Bardoli, Kamrej, Mahuwa (part) and Palsana.

The catchments area / length of the various creeks passing through Surat city is as under.

Sr.No.	Name of the creek	Catchment area (sq.km)	Length (km)	Creek Length (km)
1	Koyali Creek	13.25	8.35	8.35
2	Mithi Creek	154.05	53.28	6.50
3	Kankra Creek	226.42	8.15	8.15
4	Bhedwad Creek	40.50	15.00	11.01
5	Varachha Creek	85.54	24.57	5.07
6	Chhaprabhatha Creek	26.86	7.50	6.205
7	Tena Creek	25.91	6.84	-
8	Sonari Creek	71.77	21.28	7.94

Due to (i) heavy rain in the catchments areas of these creeks flow of water increases (ii) local rain / flood in the parent river etc as also (iii) there is lack of disposal of water in the creeks due to the effect of tides in the sea, the water in the creeks over flow in the following low lying areas and areas of societies around as listed below are generally affected.

- East Zone (varachha) - Areas on the outskirts of Nana Varachha, Kapodra, Karanj.
- South East Zone ( Limbayat) - Magob, Dumbhal, Kamrunagar, Mithikhadi, Ratanjinagar, Krantinagar, Raonagar, Sanjaynagar, Govindnagar, Salimnagar, Mandarwaje low cost colony, 181/184 Bhathena and low lying area of Anjana Chimni Tekra.
- South Zone (Udhana) - Sanjaynagar, premnagar.
- South West (Athwa) - Rasulabad, Azadnagar, Santoshinagar, Indiranagar.
- North Zone (Katargam) - Amroli, Ganeshpura- Kosad - GHB colony, Kosad village area, motavarachha.

In addition to this, if heavy rain falls in the city area during this period, care should be taken that enough water does not flow out through the storm water drainage line laid down by Surat Municipal Corporation and as such in some low lying area of the city, there may be water accumulation or increase in the level of the accumulated water.

Due to high tide waves, sea water enters these creeks whereas generally creeks direct by dispose off the water into the sea.

This Disaster Management Preparedness Plan includes most of the preplanning and necessary steps to be taken during the disasters situation that arises due to heavy rain, flood, cyclone in the areas in the banks of the above creeks in the city for seeing that there should not be loss of life & property of the people or it should be the least and after that for carrying out rescue & relief operations for establishing the normal condition and there after doing necessary activities of rehabilitation.

- All the areas around khadi and low line areas were affected by heavy rains in Surat and District in 1998 July. After that during beginning of Aug-2013 & end of June-2005 due to heavy rains in catchments areas in the districts.
- In order that the information about upper catchments areas & of rains is continuously available & is continuously monitored, it should be provided in the form attached herewith to the central control & all zonal controls. For the purpose the concerned persons should remain in contact with Taluka / district control rooms of the

## DISASTER MANAGEMENT AND PREPAREDNESS PLAN

collectorate.

- For monitoring of the level of water & is continuously between Bhathena, Jivanjyot & South Zone Office and under the bridge on Mithi Creek & for the readings of the level under the bridge near Limbayat (Mithi Creek), Bhedwad creek, kankra creek & koyali creek near the south zone office and on the bridges on other creeks marking / painting taking into account GTS, every two hours reading should be taken and filling the details of water levels of all the creeks in the attached form it should be submitted to the central control for their information.
- The concerned zone should arrange for proper information of floods in the creeks to the public so that people can shift to safe places in appropriate time.

Form of daily monitoring

(1) Information about the rain.

Sr. No.	Information about rain			Rain	
				In - inches	Millimeter
1.	Dt. - -2025 - A.M. to ( from yesterday)

**CHAPTER-41****Do this at the time of disaster  
Cyclone**

Because of low pressure cycles moves in anticlock wise or clock wise direction in a circular manner. `Cyclone` in a term original derived from the Greek Word `Cyclone` (meaning thereby a coil of snake) Cyclone is clasified as follows.

Sr. No.	Type	Speed of the wind
1	Low pressure area	Less than 17 Nautical miles
2	Depression	18 to 27 Nautical miles
3	Deep depression	28 to 33 Nautical miles
4	Cyclone Storm	34 to 47 Nautical miles
5	Severe Cyclonic storm	48 to 63 Nautical miles
6	Very Severe Cyclonic storm	64 to 119 Nautical miles
7	Super Cyclonic storm	More than 120 Nautical miles

The damage occurring of what type at what speeds of wind.

Sr.No.	Type (mph) (speed)	Damage
1	60-90	The breaking down of branches of tree & damage to katchha house.
2	90-120	Tree may fall, Pakka houses damaged communica- tion / transport damaged.
3	More than 120	Big trees may fall down, houses may set severe by damaged communication / transport senior completely stops, the glasses of doors & window of houses broken etc.

At the time of Disaster: Do this necessary  
Earthquake

Earthquake is a type of natural disaster. Earthquakes occur due to abnormal movements in the upper layers of the earth. Generally: Any disaster is forecasted and advance preparations are made to prevent the disaster and reduce the loss of life due to the disaster to a great extent. Whereas in the case of earthquake, it is not possible to predict. Due to which advance preparation cannot be done. The immediate aftermath of an earthquake is a very delicate time. The operations related to the disasters caused by the earthquake are very difficult. First of all rescue the victims / trapped people. It is necessary to carry out the work of providing first aid to the injured and taking the affected to a safe place if necessary, to the hospital. It is necessary to raise a relief and rescue team on a permanent basis in an emergency like an earthquake. So in case of storm we have made advance preparations like rescue and relief teams, heavy machinery, essential items etc. It is very important to keep it handy. In the case of earthquakes, the second and third post-disaster phases play a very important role. In the case of an earthquake, the first phase focuses on immediate treatment of the affected, disposal of dead bodies, prevention of the spread of epidemics, etc. While in the second phase, it is necessary to provide facilities like food grains, water and shelter to the affected people in coordination with all government departments and social voluntary organizations. In the third phase, permanent resettlement works and provision of cash assistance are to be done for the affected. The magnitude of the earthquake can be known from the Richter scale. The Richter scale can be used to determine the effect of the damages on the Richter scale score. In addition to the effect of damage on the Richter scale, an idea of the damage caused by an earthquake on the Richter scale is obtained from the scale mentioned below.

Apart from this, the Do's & Don'ts for people to do at the time of earthquake are as per the attached picture.

**On the prior information of cyclone to SMC control,  
SMC should immediately take following steps.**

1	Keeping rescue team ready with rescue equipment & instruments by coordinating all departments connected with rescue & relief operations.
2	Keep the adequate quantity of food materials, necessary medicines, fuel, electric generators etc handy
3	Keep the heavy machinery like bulldozer, crane etc. ready.
4	Keep the rescue center ready and keep transportation facilities ready for shifting of effected people.
5	Keep the team of health employees ready for sanitation work.
6	Transport should be halted.
7	Keep the hospitals, health and dispensaries ready with the medical team along with doctors.
8	The information of the likely cyclone should be given to the public through local radio, cable T.V., propaganda vehicle, blowing warning Siren etc. As also the slides of the available pictures should be made ready and should be exhibited cable TV & local cinema houses.

**Must do the following at the time of disaster  
Chemical and Industrial Calamity**

In the outside area of the Surat Municipal Corporation, there are many (innumerable) factories which produce / store / use hazardous chemicals / gases. The details of such risky chemical factories / industries are as follows.

Name of the Company:

- 1.Essar Steel Ltd., Hazira, Surat
- 2.Navin Fluorine Industries, Bhestan, Surat
- 3.Nuclear Power Corporation, Kakrapar, Surat
- 4.Kribhco Ltd., Hazira, Surat
- 5.Reliance Industries Ltd., Hazira, Surat
- 6.Rama Paper Mill, Barbothan, Ta.Olpad, Dist.Surat
- 7.Cyanides & Chemical Ltd., Ta.Olpad.(Now Hindustan Chemicals Co.)
- 8.N.T.P.C. Kawas, Dist.Surat.
- 9.O.N.G.C. Ltd., Hazira, Surat
- 10.I.O.C. Hazira, Surat
- 11.G.A.I.L. Hazira, Surat
- 12.G.S.P.L. Kawas, Surat
- 13.L & T Hazira, Surat

Planning of the crises management groups at different levels to avoid the loss of life due to the chemical accidents have been made.

- 1.Central Crises Group - Central Government level
- 2.State Crises Group - State Government level
- 3.District Crises Group - District area level
- 4.Local Crises Group - Local area.

District and local crises group is included in the Chemical Accident Rules-1996. these objectives of these groups are is under:

No.	Speed of Wind
1.	Unfortunate occurrences due to the calamity can be avoided, the same Happenings in the industrial organizations can also be avoided if planning should be done accordingly to minimise casualties.
2	Take Precautionary measures to prevent the spread and the repetition of the calamity.(or disaster)
3	To Provide necessary warning and information about calamity(or Desaster) and guidance regarding the calamity, publicity/transmission should be done.
4	Provide for rescue & relief operations due to calamity and the shifting of the af-fected people has to be done.

Arrange for rehearsals so that the above mentioned operations can be carried out in an orderly manner at the time of accidents.

**Rainfall & Ukai Dam Related Information**

Surat Municipal Corporation has made arrangement for making available the information pertaining to rainfall and Ukai Dam during Monsoon to citizens. Information pertaining to estimated inflow to Ukai Dam, outflow from Ukai Dam, Ukai level and Cause-way level is made available periodically through SMC Website and mobile app. With this, citizens can now have Ukai Dam related information at the tips of their finger from their convenient place at convenient time.

[www.suratmunicipal.gov.in](http://www.suratmunicipal.gov.in): Information available from Surat Municipal Corporation's website.

SMC Mobile App : Surat Municipal Corporation's mobile app can be downloaded at free from Google Play Store and Apple App Store.

- Google Play Store : <https://play.google.com/store/apps/details?id=in.smc>

- Apple App store: <https://itunes.apple.com/in/app/surat-municipal-corporation/id766167352>

# Do this invariably at the time of Disaster

## Before Flood

- Don't spread rumors. Keep Calm. Don't be afraid.
- Keep your mobile phone charged.
- Know the safest way to nearest safe place.
- To know the latest updates about weather listen to the radio or watch television.
- Be in touch with local authorities and follow their instructions.
- Keep rope, lantern, flashlight, extra batteries handy.
- Keep ready first aid kit along with extra medicines for snake bites and diarrhea and vomiting.
- Keep umbrella with you. To prevent snake bites or other poisonous creatures, keep a wooden stick.
- To save animals do not tie them up.
- Make available clean water, dry food items, candles, match boxes, kerosene.

## While Shifting

- Keep clothes, necessary medicines, valuable items, personal documents in waterproof packing
- Keep furniture & other home tools on table or bed.
- To prevent flood waters entering the house through drainage, put sand bags on top of it to keep them closed.
- Turn off the lights and gas cylinder before leaving the house.
- Keep the house locked and reach the safe place as directed.
- Move to the higher places where people and animals can take shelter
- Avoid entering into deep and unknown waters.

## During the flood

- Avoid entering into the flood waters. If necessary wear proper shoes before entering.
- Stay away from drainages and ways of water disposal paths.
- Stay away from electric poles and electric wires lying on grounds to avoid electric shocks.
- Do not keep the children hungry.
- To sterilize the surroundings, use lime or bleaching powder.
- Eat fresh cooked or dry food. Keep the food in closed vessels.
- Drink boiled water or sterilized water as per instructions of Health Department.

## After Flood

- Return home only after the instructions from local authorities.
- Do not let children go into flood water or nearby flood water.
- Avoid using damaged electrical equipment. Use them only after getting it verified from electrician.
- Be careful with broken electric poles, damaged bridges, water streams, debris, broken glass or other sharp objects.
- Follow the advice of workers associated with local authorities and emergency services.
- Inform on specified emergency control room phone numbers for relief and rescue operations in emergency.
- Do not eat food affected by flood water.
- To prevent malaria, use mosquito net.

# Do this invariably at the time of Disaster

## Before Thunderstorms / Cyclone

- Do not spread rumors, keep calm, do not be afraid.
- Keep your mobile charged.
- Listen to news and warnings regularly.
- It is advisable to use battery operated radio set.
- Verify that the radio set is in operational condition.
- Try to stay in touch with local officials.
- It is advisable to relocate immediately after first warning if you live in hazardous/risky area.
- Adhere to instruction for relocation from government if any.

## During Thunderstorms / Cyclone

- Avoid taking shelter in decrepit house or under a tree.
- Listen to the news on radio or TV and follow the instructions given.
- Do not take risk of going outside during thunderstorm/cyclone.
- If no instruction is received for evacuating the house, take shelter in the strongest part of house and stay inside.
- It is not advisable to travel through train or go for sailing during thunderstorm/cyclone.
- Avoid staying on the terrace of high-rise buildings or houses.
- If outside the house, stay away from electric wires, electric poles or electric equipment.

## After Thunderstorms / Cyclone

- Do not try to enter damaged buildings.
- Help the affected people.
- Use phones only for necessary purposes.
- Stay in the house only if the house is safe.
- Go outside the house only after confirming that the thunderstorm is over.
- Follow the instructions of local officials.
- Wait for the directive regarding safety on radio and televisions.
- Stay away from broken electric cables, bridges and buildings.
- Be cautious of metal plates, pieces of glass, snake and other poisonous creatures while passing through debris.
- Stay away from flooded area.
- Wait for 24 hours before leaving for sailing or for fishing.

# Do this invariably at the time of Disaster

## Thunderstorms/Cyclone

### Before Thunderstorm/cyclone

- Be aware of safety of belongings and pet animals while shifting to safe place.
- Un-tie the animals.
- Fishermen should not go for fishing, keep the boat at safe place.
- Salt maker in should shift to safe location.
- To avoid the damages of thunderstorms, harvest the crops ready for harvesting.
- Keep the locations with higher grounds in mind.
- Keep radio, torch, lantern, extra batteries handy.
- Keep provision of food, water and medicines enough for a week for kids and patients (sick persons).
- Keep first aid kit, clothes, snacks, drinking water, and blankets handy.
- Keep important phone numbers handy.
- Store drinking water in closed vessels.

### During Thunderstorms / Cyclone

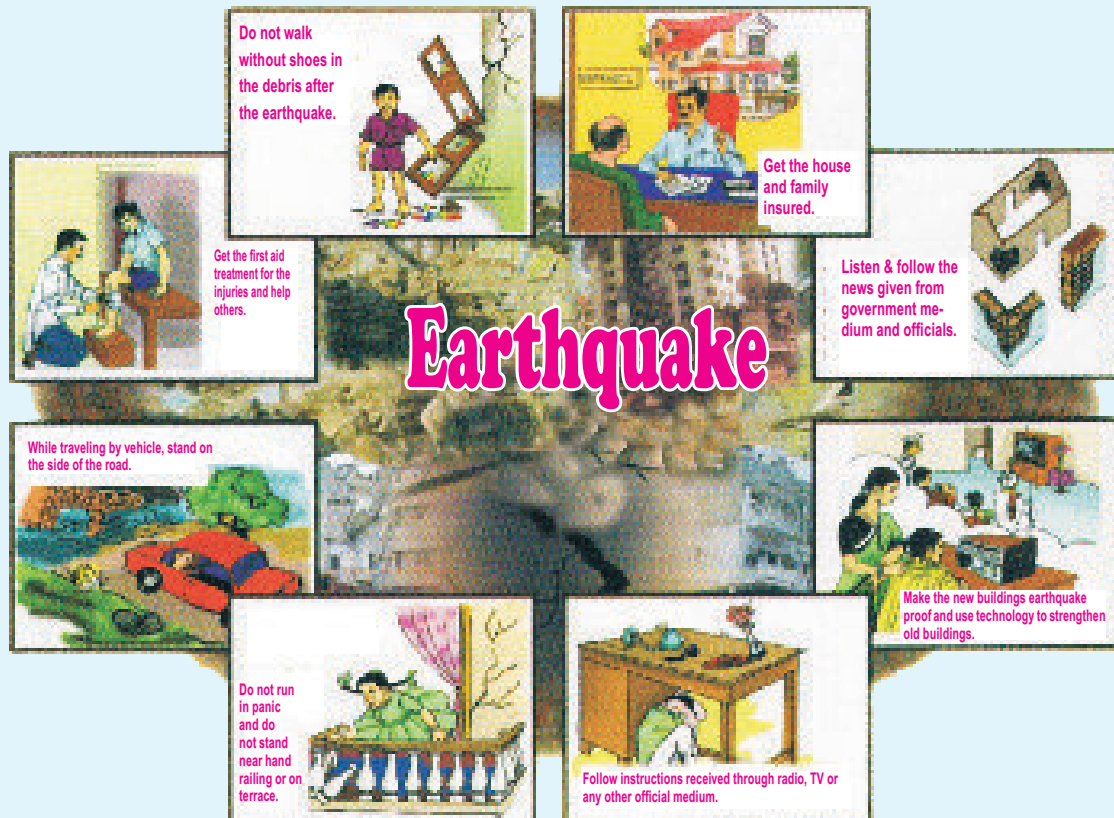

- Turn off electricity and gas connections.
- Close all doors and windows of house. Take special care of kids.
- If stuck in open area, take shelter at safe place.
- Pay attention to warnings issued, do not go out for side (picnic?fun?enjoy?>)
- Do not stand near trees, sea, electric poles, and wire lines.
- Stay away from electric poles.
- Fishermen should not go for fishing, keep the boat at safe place.
- Salt maker give up Salt of Safe side take shelter
- Prevent rumors by avoiding spreading of incomplete or false information. Only follow instructions received from credible sources.

### After Thunderstorms/ Cyclone

- Avoid using electric equipment if they are wet.
- Check for gas connection leakage. If found any leakages, open all the windows and go out of the house.
- If you have been relocated to another place, return only as per instructions and through specified route by the officials.
- If electric equipment are damaged, switch off the main power switch. Get the equipment repaired from authorized personnel.
- Use boiled water for drinking.
- If water and drainage lines are damaged, do not use toilets and do not use tap water.
- You can contact fire brigade, police, municipality control room and district mamlatdar office's control room for rescue work.
- Initiate rescue work immediately with the help of appropriate authority and do not use any shortcuts.
- Only use safe food after the thunderstorm.

# Do this invariably at the time of Disaster

## Before Thunderstorms / Cyclone

- Discuss & educate your family members about dos and don'ts regarding earthquake.
- Make the new buildings earthquake proof and use technology to strengthen old buildings.
- Get the house and family insured.
- Get the training for first aid and fire extenuation
- Do not keep heavy or delicate items on the shelves
- Do not keep photo frames, mirrors or glasses near the bed.
- Keep important documents, cash and few necessary items handy in a bag.

## During Thunderstorms / Cyclone

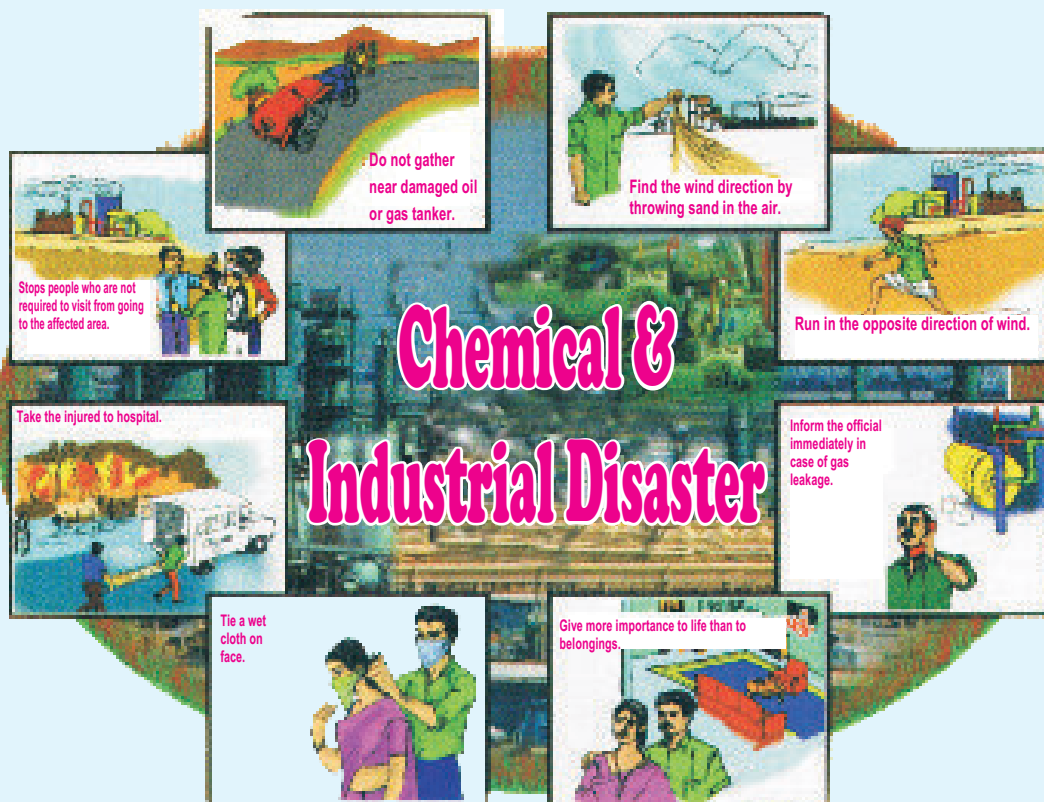

- Do not run in panic.
- Move to open space in the house. If in the high rise building, do not use elevators.
- Take shelter under the table or strong door frame or wall.
- While traveling by vehicle, stand on the side of the road.

## After Thunderstorms/ Cyclone

- Do not be afraid of after-shocks of earthquake.
- Get the first aid treatment for the injuries and help others.
- In case of fire, help to control the fire.
- If gas leakage is found in the kitchen, do not turn on any switch or do not light the matches.
- Do not make unnecessary calls and jam the telephone lines.
- Do not walk without shoes in the debris after the earthquake.
- Keep all light switches turned off.

# Do this invariably at the time of Disaster

## TABLE POINTS

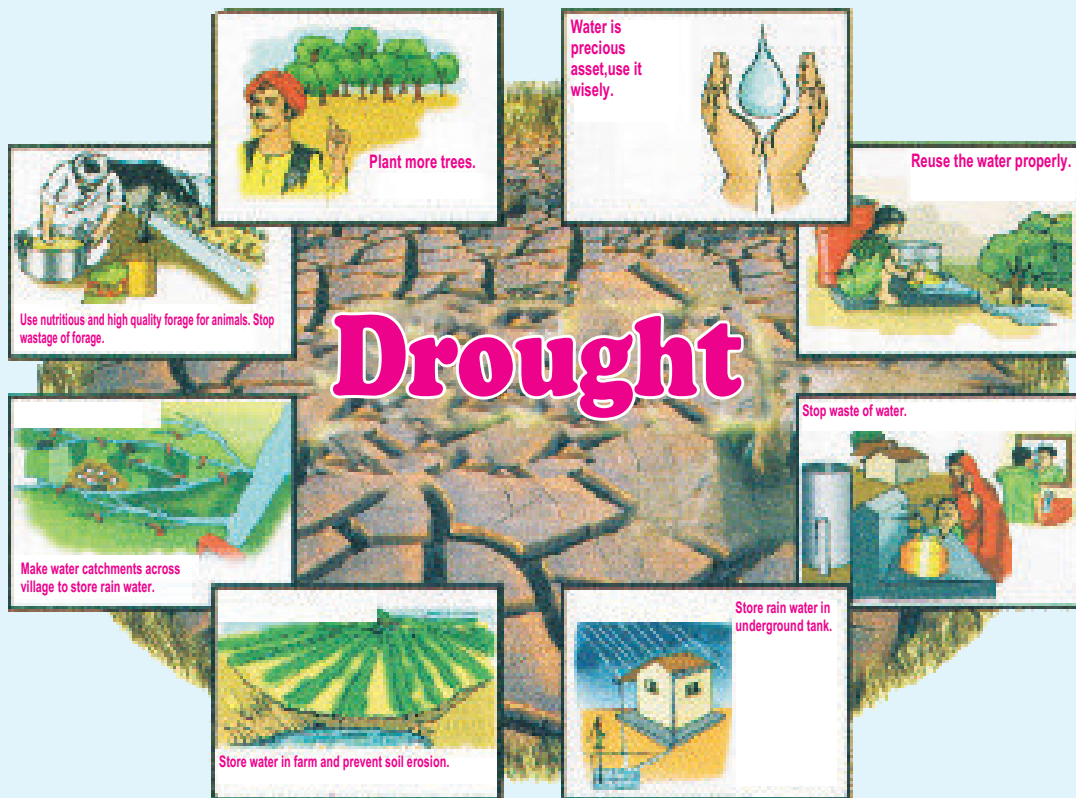

- If you find that there is poisonous gas in the air, then first go to open space and find the wind direction by throwing sand in the air.
- Run in the opposite direction of wind.
- Tie a wet cloth on face.
- Life is more precious than belongings and properties. It is more important to save life. Give more importance to save life than to belongings.
- If you find a gas leakage, inform the neighbors and also if possible, inform the concern officials immediately.
- If Oil is spilled in the sea, do not go near to sea.
- Do not smoke near tankers filled with chemicals.
- Do not stand near damaged, tankers filled with chemicals or gas.
- Do not enter in the area where gas is spread in the air.
- Give artificial respiration to those who are unconscious due to the effect of gas.

## TABLE POINTS

- Take immediate treatment if feeling suffocated.
- Do not smoke near Petrol pump or gas storage.
- In case of gas leakage, turn off the gas stove or heater. Do not light matches or use lighter.
- Stop people not required to visit from visiting the affected area.
- Relocate the elders, kids, handicapped or weak persons to safe place.
- Do not leave the safe place without instructions from officials.
- Do not collect chemicals from damaged tankers.
- Un-tie the animals and move them to safe place.
- Keep the house locked and reach the safe place as directed.
- Move to the higher places where people and animals can take shelter
- Avoid entering into deep and unknown waters.

# Do this invariably at the time of Disaster

## TABLE POINTS

- Water is precious asset, use it wisely.
- Stop waste of water.
- If you save water, water will save you.
- Store rain water in underground tank in house.
- Make underground tanks to store rain water and use it when needed.
- Reuse the water properly.
- Use sprinkler irrigation or drip irrigation methods the most.
- Stop rain water from entering the sea.
- Grow crops which requires lesser time and less amount of water.
- Make water catchments in farms, small check dams and embankments to store rain water and prevent soil erosion.

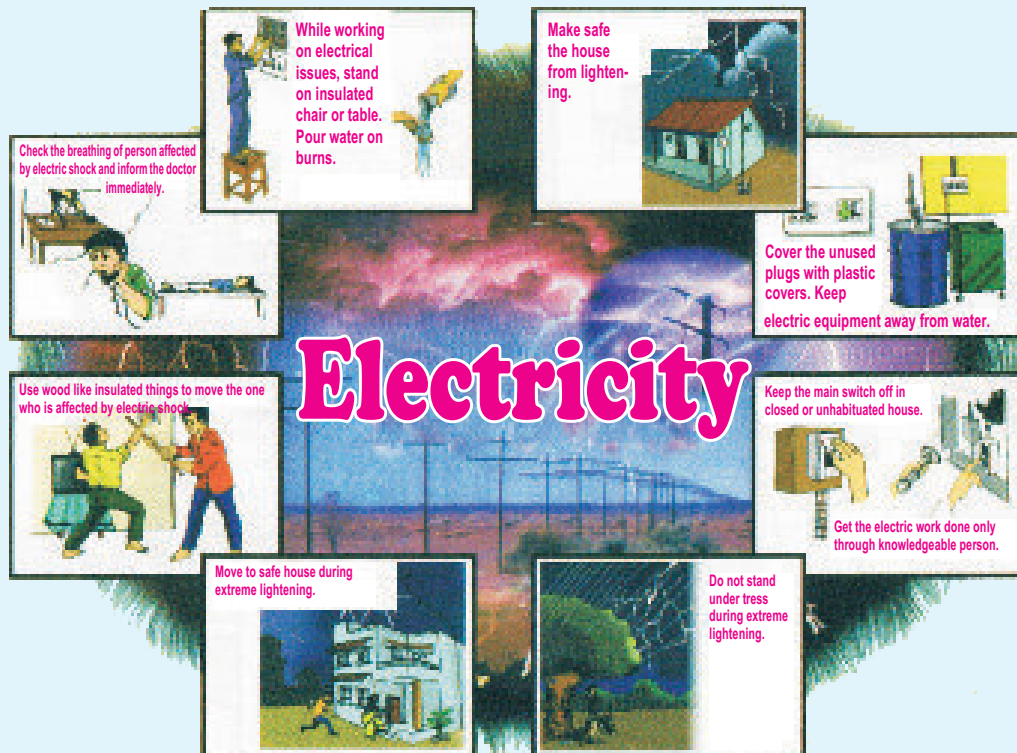

## TABLE POINTS

- Enrich ground water by recharging wells and tube wells using rain water harvesting.
- To keep villages enrich with water, make water catchments in various area of villages through public private partnership.
- Make embankments across farms and perform ground leveling across the farm.
- Vaccinate animals and pay good attention to their health.
- Stop wastage of forage. Use urea to make forage more nutritious and of high quality.
- Use organic fertilizers the most.
- Use the method of crop rotation to keep the soil fertile.
- Grow extra grass in fallow land.
- Store useful grains.

# Do this invariably at the time of Disaster

## TABLE POINTS

- Cover the unused plugs with plastic covers.
- Keep electric equipment away from water lines and moisture.
- Take necessary care to prevent lightening to enter in building.
- Move to safe place as per instruction from officials.
- Use switches which turns off automatically in case of short circuit.
- Every member of family should know the main power supply switch in the house.
- Get the electric work done only through knowledgeable person.
- While working on electrical issues, stand on insulated chair or table.
- Move to safe house during extreme lightening.

## TABLE POINTS

- Do not stand under tress during extreme lightening.
- Remove all the equipment from power plugs.
- Do not hold fishing rod or umbrella.
- Do not touch electric poles or telephone poles.
- Do not enter into water.

### After affected by electric shock

- Use wood like insulated things to move the person affected by electric shock from electric supply.
- Turn off the main switch for power supply.
- Do not touch the person who is affected by electric shock.
- If the person affected by electric shock has burns, pour water on burned part of body.
- Check the breathing of person affected by electric shock and inform the doctor immediately.
- Do not try to remove clothes from burned part of body.

# Do this invariably at the time of Disaster

## TABLE POINTS

- Always drink filtered and clean water for drinking
- Keep vessels of drinking water clean.
- Add chlorine tablets in drinking water.
- Drink boiled water. Eat fresh food.
- In case of Diarrhea or vomiting, take liquid food.
- Remove Dinginess.
- If garbage is spread across the surroundings, remove them immediately and make the environment clean.
- Take necessary steps to prevent mosquito breeding.
- Keep doors and windows closed during sunrise and sunset.
- Use mosquito repelling coil or fogging of neem leafs in house to keep mosquitos away.

## TABLE POINTS

- When insecticide spraying is going on, get the spraying done in your house too.
- Get vaccination for T.B., Polio, DPT and measles done.
- Identify drinking water leakages and repair them immediately.
- Clean water puddles across the house and get insecticide spraying done.
- Every week clean the vessels used to store water in house.
- Use mosquito bed net during night for sleeping.
- Spray kerosene, burned crude oil or other oil on logged water.
- In case of fever go for blood test for malaria.
- Do not take unnecessary medicines. Take medicines as advised by doctor related to the disease.

# Do this invariably at the time of Disaster

## TABLE POINTS

- Do not harm others for personal addiction or personal interest.
- Do not through matches, cigars, ash anywhere with carelessness.
- Wear tight clothes in kitchen. Make sure the cloth hem does not catch fire in stove.
- Do not forget to turn off gas regulator.
- Get the wiring of house checked regularly.
- Short circuit can happen if multiple connections or multiple equipment are connected in single plug.
- Risk of fire due to gas leakage is reduced by keeping windows opened.
- To extinguish the fire, apart from water, sand or blanket can be used too.

## TABLE POINTS

- Do not smoke near petrol pump or gas storage.
- Get fire extinguisher and learn to operate it.
- Use water to extinguish fire from burned person. If using blankets, remove it immediately after fire is extinguished.
- Do not scratch burns. It is harmful for body and it can cause infection.
- In case smoke is spread during fire, come out of house by leaning on floor or by sitting on floor which can help in breathing.
- Do not enter in the house which is on fire.
- Move the person with burns to hospital.
- Keep kids away from fire crackers and highly inflammable items.

# Do this invariably at the time of Disaster

## Advance care

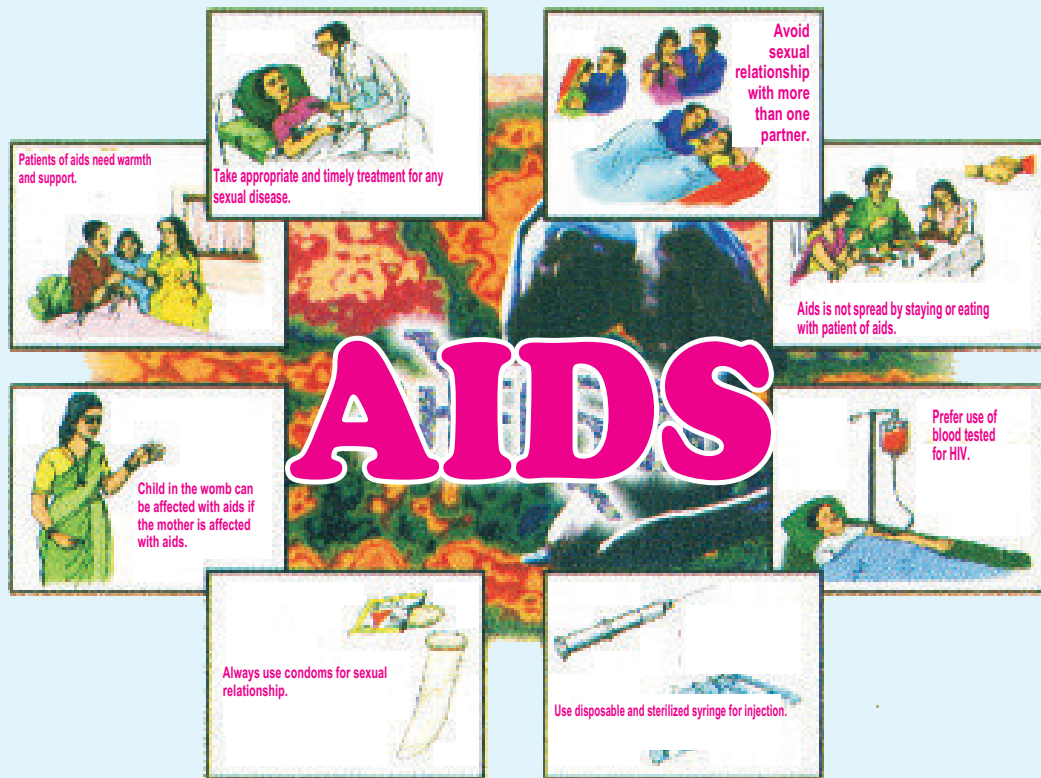

- Always keep your vehicle in good condition.
- Get life and accidental insurance.
- Keep copy of necessary documents of vehicle and insurance in the car.
- Keep first aid kit and small equipment necessary in emergency situation handy in car.
- Keep important phone numbers and name and addresses of relatives on paper. Keep that paper in car.
- Also include details regarding blood group in the paper.
- Always keep seat belt fasten while driving.
- Drive in proper lane and do not drive on wrong side.

## TABLE POINTS

- Keep driving license with you. Drive within specified and controlled speed.
- Take proper care before crossing railway tracks.
- In case of accident, try to keep stable mental situation and call or inform police and ambulance.
- Take the one injured out of the vehicle and give him/her first aid treatment immediately.
- Make sure people do not gather at the location of accident.
- Make necessary arrangement for the safety of goods at the spot of location.
- If any inflammable items are spread then take necessary steps that it does not catch fire and try to keep people away from location.

# Do this invariably at the time of Disaster

## Advance care

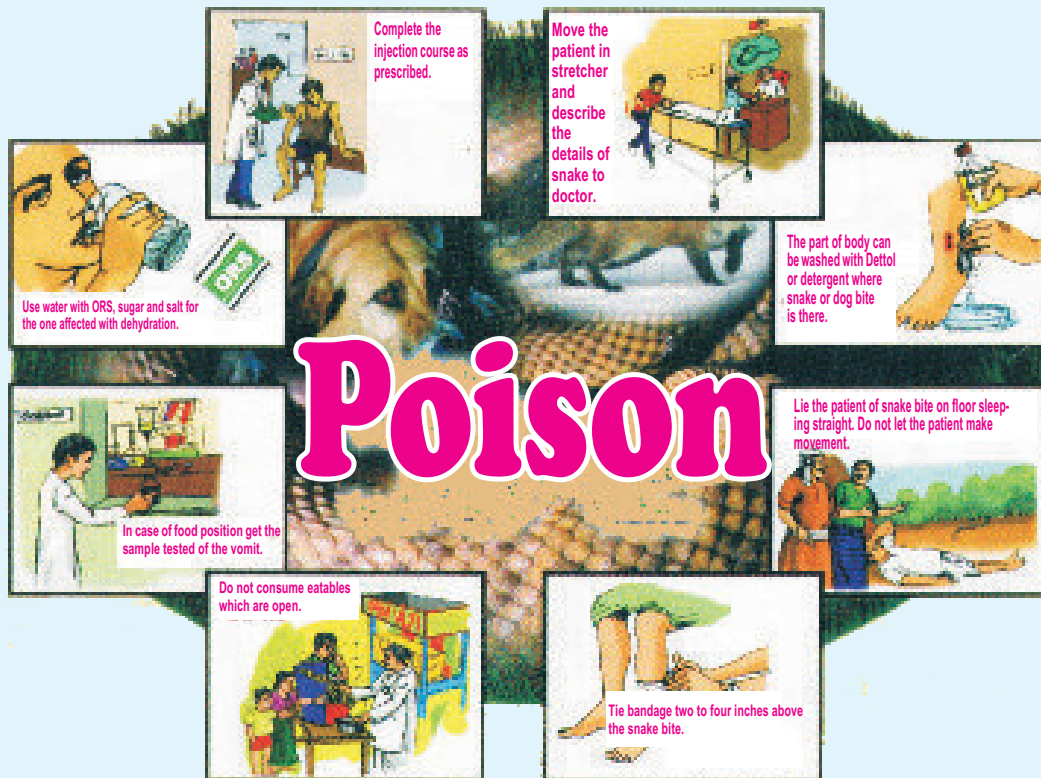

- Always use condoms for sexual relationship.
- Use disposable and sterilized syringe for injection.
- Avoid sexual relationship with more than one partner.
- Take appropriate and timely treatment for any sexual disease.
- If there are wounds or scratches on hand, cover them with plastic.
- For aids prevention is the only cure.
- The diagnosis of aids is done through two different ELISA tests.
- For free information and help related to aids in city of Ahmedabad, Vadodara, Surat and Rajkot, dial 1097.

## Correct Information

- Aids is not spread by staying or eating with patient of aids.
- Aids is not spread by using the toilet used by patient of aids.
- Aids is not spread by shaking hands with others.
- Aids infection is not spread by donating blood.
- Aids infection is not spread by mosquito bite.
- Aids is not spread by living a normal life with patient of aids.
- Aids is not spread by using food vessels used by patients of aids.
- Patients of aids need warmth and support.
- Patient of aids should contact voluntary counseling and testing center, Civil Hospital, Ahmedabad operated by Gujarat State Aids Control Society.

# Do this invariably at the time of Disaster

## TABLE POINTS

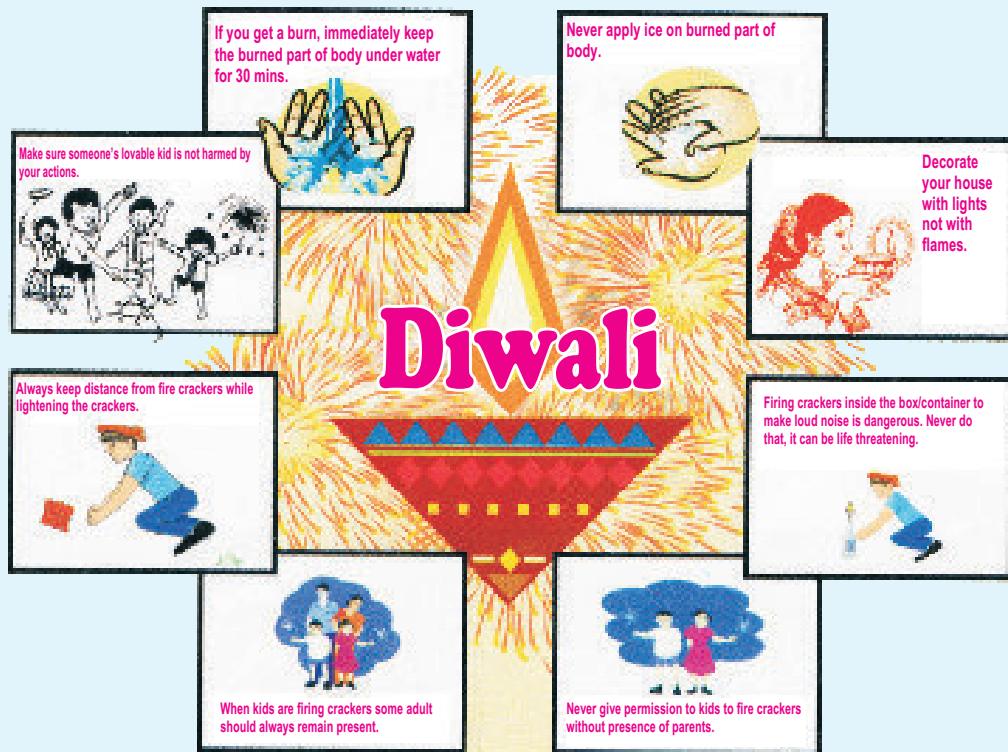

- Snakebite
- Not every snakes are poisonous, so do not be scared after getting a snake bite.
- Do not make movements. Sleep upfront so that blood circulation is reduced.
- Tie bandages two to four inches above the snakebite on body.
- Do not cut or scratch the area on body where snakebite is there.
- If the body is feels to be getting colder, use blanket to cover the body.
- If required, give artificial breathing to the patient.
- Do not apply ice or do not apply current on the wounds of snakebite.
- Move the patient in stretcher and describe the details of snake to doctor.
- In case of dog bite,

## TABLE POINTS

- In case of dog bite, clean the wounds with detergent or Dettol.
- Complete the course of injection as prescribed by the doctor.
- Food Poison
- Do not eat trite food sold in market.
- In case of food poisoning get the sample tested of the vomit.
- In case of food poisoning, describe the type of food and time of food consumption to doctor.
- Continuously give water with salt and sugar to patient.
- Immediately contact the doctor. If the patient is unconscious, the keep the patient at secure place.
- Check pulse and breathing of patients at every 10 mins.
- Confirm any history related to chronic disease or heart related disease of the patient and inform the same to doctor.

# Do this invariably at the time of Disaster

## TABLE POINTS

- Keep fire crackers at safe place in house.
- Items which can catch fire from Incense sticks or fire lamp, keep them at secure place.
- When fire crackers are bursting, keep windows closed. Also keep bucket of water ready.
- Do not light crackers inside the house or in lobby.
- Park your vehicles properly on streets so that emergency and fire extinguisher vehicles can pass easily.
- Do not keep items which can catch fire on terrace, shed or in yard or lobby. If such items are there, move them to safe place.
- Take necessary care that fire crackers like rocket, day-out, night-out do not enter in the house.

## TABLE POINTS

- Take extra care while firing crackers in slum area.
- Fire wheel crackers and sparkles in the presence of elders.
- Make sure that fire crackers do not harm people passing by the streets.
- If you get a burn while firing crackers, clean the wounds with a clean cloth. Pour cold water on the burn and use burnol style ointments on it. If required after the first aid treatment go to the doctor.
- It is very dangerous and devastating to fire crackers inside the building or on the terrace of building.

# Do this invariably at the time of Disaster

## Kite Flying

### TABLE POINTS

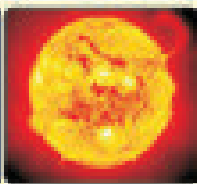

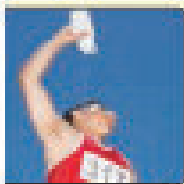

- Keep fire crackers at safe place in house.
- Items which can catch fire from Incense sticks or fire lamp, keep them at secure place.
- When fire crackers are bursting, keep windows closed. Also keep bucket of water ready.
- Do not light crackers inside the house or in lobby.
- Park your vehicles properly on streets so that emergency and fire extinguisher vehicles can pass easily.
- Do not keep items which can catch fire on terrace, shed or in yard or lobby. If such items are there, move them to safe place.
- Take necessary care that fire crackers like rocket, day-out, night-out do not enter in the house.

### DOs

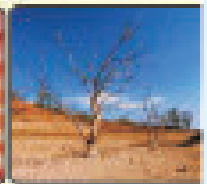

- Take care of the environment of your surroundings.
- Make sure that the walls of terrace are of good height. Stay away from wires passing through terrace.
- To ensure no damage through passing kite thread, two wheeler drivers are advised to drive slowly. It is recommended to fly kites in open grounds than on terrace.
- Common sense, goodness and consciousness is very important.
- Do not keep items which can catch fire on terrace, shed or in yard or lobby. If such items are there, move them to safe place.
- Take necessary care that fire crackers like rocket, day-out, night-out do not enter in the house.

### TABLE POINTS

- Avoid indecent shouting with others. It can cause tense situation.
- Do not fly kites from the terrace which does not have railings.
- Flying kites near the roads or by climbing on vehicles can cause accidents.
- Do not run after the kites.

## To survive heat stroke/sun stroke during summer

### DOs

- Wear cotton clothes in summer.
- Use caps, umbrella and glasses so that it can help covering the face.
- If you happen to go outside make sure the entire body including the head is covered.
- Avoid direct sun light and stand under a tree with a shade and coolness.
- Drink ample amount of water and also drink lemon juice if possible.
- Cover head with wet cloth and if required use wet cloth on body to keep the body cool.
- Kids, pregnant women, elders and patients should take extra care in sunshine.
- Mix Palash (Kesudo) flowers or neem leaves in water for giving bath to kids.
- In case of headache, restlessness, dizziness, nausea or fever consult the doctor of nearest hospital and take necessary treatment.

### DON'Ts

- Do not eat trite food sold in market.
- Avoid use of ice sold in market.
- Avoid eating items made of milk or pulp in wedding functions.
- Do not remain starved in summer.

Do this invariably at the time of Disaster

## Climate is changing

### Measures for safety of gas used for cooking.

#### TABLE POINTS

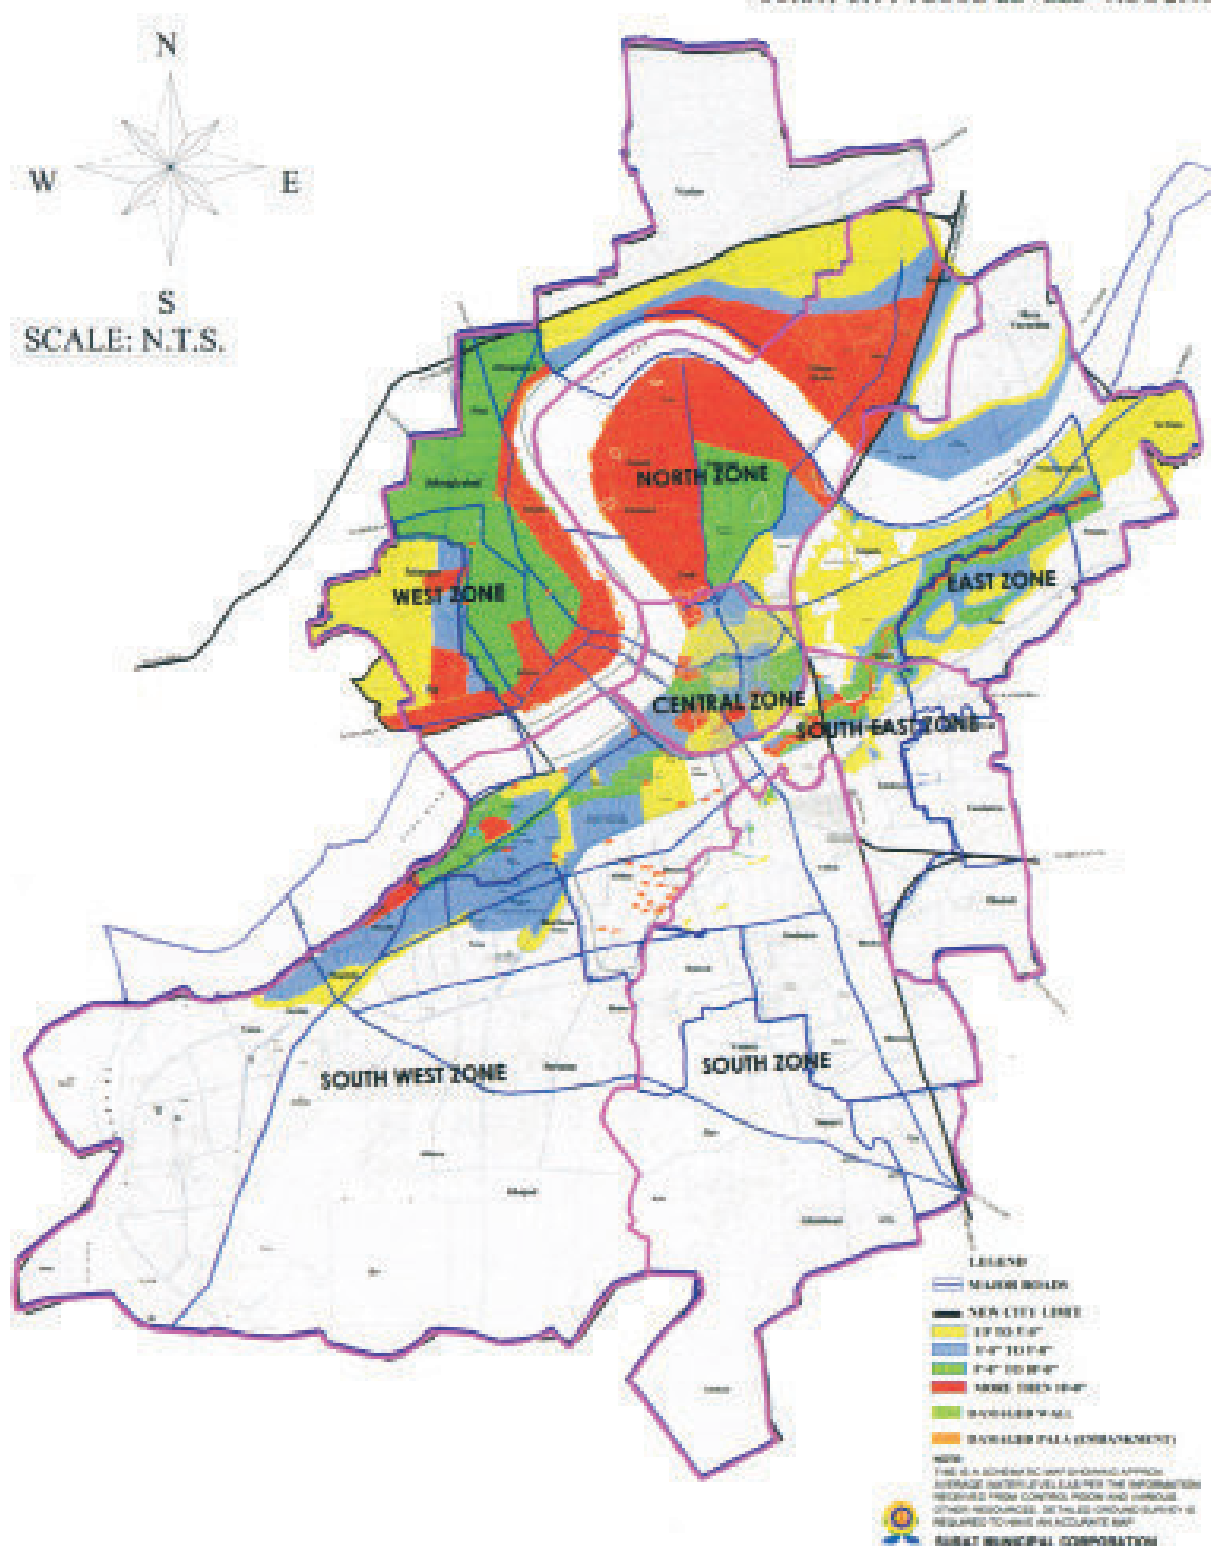

- Use softpad or ramp to unload or shift the gas cylinder.
- Use cylinder cap while shifting or controlling the gas cylinder.
- Differentiate inactive, poisonous, non-flammable, flammable cylinders while storing them.
- Store empty and full poisonous gas cylinder without marking separately.
- Use proper labeling for the storage area.
- Use a dolly while shifting the gas cylinder.
- Keep the cylinder in up front position.
- Mark the gas cylinder storage area with No Smoking zone.
- Store flammable cylinders with extra care.
- Use trolley while shifting or performing any maintenance with cylinder.
- Keep the cylinder storage space and cylinder usage space separate.
- Keep the valve caps closed until connected with gas stove

#### TABLE POINTS

- Do not roll gas cylinders.
- Do not use cylinders without pressure gauge.
- Do not open cylinder in heat or light.
- Do not change the color of cylinder.
- Do not use hammer or such items to open the cover of cylinder.
- Do not make multiple connections from single gas cylinder.
- Do not store gas cylinders in area with slopes or with narrow lanes.
- Do not store gas cylinders in cup boards or in shelves.
- Do not use unnecessary force/pressure to connect the cylinder.
- Do not move cylinder in two wheeler or bicycle.
- Do not use cylinder without proper markings and identity.
- Do not store gas cylinders in the area with sunlight.
- Do not use magnets to start or stop the gas cylinders.
